2015 is a year of anniversaries for us here at CZ-USA. Most notable is the 40th Anniversary of our model 75, a pistol that has become an icon in the firearms world. With a reputation for accuracy, reliability and capacity, it’s a timeless design that forms the basis for most all of our pistol line. To celebrate the 75’s 40 year anniversary, the factory’s master engraver was tasked with designing a unique pistol in commemoration. The 40th Anniversary Limited Edition is beautiful and unique, with only one thousand being created.

Another anniversary is that of CZ-USA’s acquisition of Dan Wesson. One decade ago we added Dan Wesson Firearms to our family, bringing their line of fine 1911s to a greater audience through our authorized dealer network. Over the years they have grown and expanded, and Dan Wesson production today looks nothing like it did when we brought them on. One thing has never changed -- our unwavering commitment to building production 1911s with superb fit and finish. We are proud of the fact that many customers compare our production 1911s to other manufacturers’ custom guns -- they’re just that good.

Joining our lineup of Dan Wesson handguns are two new models and one blast from the past. The Silverback and Valkyrie are our response to customer input, slight variations on our current designs that bring customers options that previously were only available in custom orders. The throwback pistol that joins our catalog this year is the Dan Wesson 715. Like our 75, it’s a legendary model that draws its heritage from designs crafted over 40 years ago. With the time-tested interchangeable barrel system and forward crane latch, the Dan Wesson revolver has a reputation for accuracy, being a favorite of silhouette shooters for many years.

With as many anniversaries as we are celebrating, I am proud to say that our lineup of firearms for 2015 is one of the most diverse that we’ve ever offered. Whether you hunt, protect or compete, we have a firearm for the task.

Alice Poluchova
President
Česká zbrojovka Uherský Brod (CZUB) has been designing and manufacturing small arms since 1936. Nearly 80 years of experience has resulted in legendary pistol designs. One of the first “Wonder Nines,” the CZ 75 has become an icon in the pistol world (in fact, searching for Wonder Nine on Wikipedia® returns a picture of a CZ 75 B).

Applying theme and variation to armaments, CZUB has crafted a wide variety of models based off of the standard pistol, from the railed SP-01 Tactical to the concealed-carry friendly RAMI to the competition-gared Czechmate. The common themes running through the line are the slide-in-frame design, ergonomic grip shape and low bore axis resulting in less felt recoil.

Models are available in safety and decocker versions, and the polymer Omega pistols can be swapped back and forth between the two safety styles with minimal tools. Many models are DA/SA, allowing a choice between cocked-and-locked carry or decocked for a heavy first pull much like a revolver. Some are single action only, with a trigger pull that is ideal for punching holes in paper or setting steel to ringing.

The recent P-07 and P-09 pistols take the 75’s distinctive heritage to a polymer platform, which allows them to shed some weight and gain ammunition capacity. Still a hammer-fired DA/SA pistol, the P-07/P-09 are true to the 75 legacy with a slide that rides inside the frame and a comfortable grip that points naturally. Add to that the P-09’s 19+1 capacity and you’ve got the makings of a new legend.

**CZ SCORPION EVO 3 S1 PISTOL**

Finally available for public consumption is the much-anticipated Scorpion sub-gun. Imported as a pistol, it is a blowback-operated semi-auto in 9mm with a short 7 3/4” barrel. Equipped with our newly-designed low-profile sights, the rear sight has four different aperture sizes for everything from close-quarters to way out there. The sights ride on an 11-inch Picatinny rail perfect for mounting optics.

Simple and reliable, the Scorpion not only has ambidextrous controls, its non-reciprocating charging handle is swappable and reach to the trigger is adjustable.

Our favorite accessory for the Scorpion pistol is our new arm brace adapter, which quickly and easily adds an AR-style pistol buffer tube to the rear of the action, enabling the use of an arm brace for added stability.

The most impressive stat on the Scorpion Pistol is the price tag. At just $849, it’s a whole lot of bang for the buck.

**CZ 805 BREN PS1 PISTOL**

The first civilian legal form of our 805 Bren is the PS1 Pistol, equipped with an 11-inch barrel in .223/5.56. Utilizing the ubiquitous STANAG magazine used in the AR-15/M16, the 805’s action is housed in a one-piece aluminum upper receiver with monolithic Picatinny rail.

At the rear of the action is a multi-purpose mounting point, fit from the factory with a single point sling attachment.

The addition of our accessory arm brace adapter coupled with the effective factory-equipped two-port brake make the Bren impressively stable to shoot in pistol form. It shares the same low-profile sights as our Scorpion – adjustable aperture rear and post front.

**CAL:** 9mm Luger  **FINISH:** Black composite

**CAL:** .223/5.56x45  **FINISH:** Black composite/Bronze anodized
CZ 1911 A1

MAIN FEATURES:

- .45 ACP (1:16 LH twist)
- Two 7-round magazines
- 5" barrel
- Grip and thumb safety
- Carbon steel slide and frame
- Black oxide finish
- Fully-checkered walnut grips

CZ 1911 A1

2015 brings the launch of the first pistol made in the USA that bears the CZ name. The CZ 1911 A1 is an homage to the past, a 5" government sized model built as a modern incarnation of the original 1911 A1. That original was adopted into US service in 1924, 'improving' on John Moses Browning's original design. Our version makes several small 'improvements' as well, swapping the checkered plastic grips for checkered walnut, adding serrated slide stop, magazine catch and magazine housing and using a stainless steel barrel. For the sake of the shooter, we elected to forgo the lanyard loop, and added a taller set of sights that are easier to use, with the front dovetailed in so that it can be swapped more easily. Though there are a number of changes, we feel the CZ 1911 is still true enough to the original service pistol to wear the A1 name.

Built with much tighter slide-to-barrel and slide-to-frame tolerances than vintage models, the result is much improved accuracy without compromising reliability. Built without a trigger safety, the trigger itself is aluminum, with pull specified at 5 lbs., give or take a pound. Its forged carbon steel frame and slide are finished in a black oxide and it ships with two 7-round magazines.

CAL: .45 ACP
FINISH: Black oxide finish

CZ 75

40th Anniversary

CZ 75 40th ANNIVERSARY (LIMITED EDITION)

During the forty years since its 1975 introduction, the CZ 75 has grown to be one of the most important handgun designs in history. Over the last four decades, the 75 became the most widely used handgun among police and military worldwide and ranks in the top two most copied handgun designs ever. To celebrate the anniversary, CZUB set their master engraver, Rene Ondra, to the task of creating a special pistol for the occasion. Each pistol is hand-engraved in the Czech Republic in true old-world style, with a hammer pushing the engraver's tool through each minute detail of the art decorating the slide and frame, which are then polished and finished in a deep, glossy blue.

The controls, extractor, grip screws and magazine baseplate are finished in a rainbow titanium nitride, an attractive and extremely tough finish. Lest there are any concerns about the durability of this finish, this is the same type of finish that is applied to drill bits to extend their working life up to three times those without the coating. To finish off the look, smooth, high-grade California birds-eye Maple grips are added. Dyed to match the hues of the frame and controls, the grips seem otherworldly, looking less like wood and more like a snapshot sent to Earth from the Hubble Space Telescope.

Chambered in 9mm, the 40th Anniversary Limited Edition ships in a leather-bound presentation case with two 16-round magazines. Only 1000 pieces will be produced, each individually numbered and accompanied by a certificate of authenticity.

CAL: 9mm
FINISH: Glossy blue/rainbow titanium nitride

FULL-SIZE CZ 75/85

TIMELESS DESIGN, SUPERB PERFORMANCE

On October 12th, 2007 CZ built the 1,000,000th CZ 75. Designed in 1975, the CZ 75 utilizes all the best features from service pistols around the world. An entire family of pistols is available based on the CZ 75 design, including compacts, decockers, single action only, ambidextrous, alloy frames and even competition pistols. More and more of the top pistol shooters in the US are transitioning to the CZ 75 family of pistols for both IPSC and IDPA competition.

“The CZ 75 represents a significant step forward in autopistol design. In the thirty years since it first appeared, the CZ 75 has exerted an enormous influence on service pistol design and it remains one of the best of the genre despite its age.”

- Gene Gangarosa, Jr., Combat Handguns®, 2004

CZ 75

MAIN FEATURES:
• High capacity double-stack magazine
• Hammer-forged barrel
• Ergonomic grip and controls
• Unparalleled accuracy
• Slide-in-frame design for better recoil control
• 3-dot sighting system (Tritium night sights available)
• Extended service life due to advanced design and superior materials
• Firing pin block safety (on most models)

CAL: 9mm Luger
FINISH: Black polycoat

MODEL VARIANTS:
• 75 9 mm Luger- classic CZ 75 trigger system
• 75 .40 S&W- Ambidextrous safety and full-length slide rails
• 75 BD 9mm Luger- Decocking lever
• 75 SA 9mm Luger- Full-length slide rails, single action trigger only, extended beavertail and ambidextrous safety
• 75 SA .40 S&W- Full-length slide rails, single action trigger only, extended beavertail and ambidextrous safety
• 85 9mm Luger- Ambidextrous safety and slide release
• 85 Combat 9mm Luger- Ambidextrous safety and slide release, no firing pin block, adjustable sight

CZ 75 B Ω

IMPROVED FEATURES

OMEGA CHANGES INCLUDE:
• REDUCTION IN THE NUMBER OF MOVING PARTS
• ENHANCED SERVICE LIFE AND RELIABILITY
• EASY ASSEMBLY AND DISASSEMBLY
• SIMPLE MAINTENANCE

The CZ 75 B Ω (Omega) features a simpler, more robust version of the 75’s trigger system. The interlocking design of the trigger mechanism’s parts allows for easy disassembly and reassembly without the need for tools, so taking the pistol down beyond a basic field strip is much easier than on a standard 75. Not only does this simplify maintenance, the trigger parts themselves are made of different materials, enhancing durability, operation life and reliability.9mm Luger - overall matte black polymer.

MODEL VARIANTS:
• 75 B 9 mm Luger- classic CZ 75 trigger system
• 75 B .40 S&W- Ambidextrous safety and full-length slide rails
• 75 BD 9mm Luger- Decocking lever
• 75 SA 9mm Luger- Full-length slide rails, single action trigger only, extended beavertail and ambidextrous safety
• 75 SA .40 S&W- Full-length slide rails, single action trigger only, extended beavertail and ambidextrous safety
• 85 B 9mm Luger- Ambidextrous safety and slide release
• 85 Combat 9mm Luger- Ambidextrous safety and slide release, no firing pin block, adjustable sight

= CALIFORNIA DOJ APPROVED
FULL-SIZE CZ 75/85

CZ 75 B HIGH POLISH STAINLESS

The CZ 75 Stainless is the first stainless steel frame to bear the CZ name. With the exception of an ambidextrous manual safety and rubber grips, the stainless version is functionally identical to the CZ 75. The biggest difference is an improvement in corrosion resistance, though many will argue there is an improvement in appearance as well.

MODEL VARIANT:
• 75 B Matte Stainless

KADET ADAPTER

The CZ 75 Kadet conversion kit is a separate accessory for the CZ 75/85 pistol series allowing the firing of .22 LR caliber cartridges.

The CZ 75 fitted with the Kadet .22LR conversion is the perfect training or plinking pistol with the slide weighted and balanced just like the CZ 75. Like its centerfire counterpart, the CZ 75 Kadet is an all-steel model complete with adjustable sights.

Includes two 10-round magazines that fit flush with grips of the full size CZ 75 and SP-01 models. The Kadet conversion kit will work on the CZ 75 compact models including the P-01, P-06 and PCR, but the full-size magazines will extend below the bottom of the compact grips of these models. The Kadet conversion will not work on the 97, 75 TS, or any polymer models. The P-01, PCR, P-06 and steel Compact in .40 require a PCR slide stop. On 85s, the Kadet slide stop will not work, the factory 85 stop must be used which won’t allow for last round hold-open.

CZ 75 SP-01

 Featuring an integral 1913 accessory rail on the dust cover, rubber grip panels and CZ’s corrosion-resistant black polycoat finish, the SP-01 is one of the most popular of all pistols based on the CZ 75 platform. Borrowing from the improved grip geometry of the compact P-01, the SP-01 utilizes an extended beavertail to protect the shooter’s strong hand as well as allowing for a deeper and more secure grip. The grip geometry, checking in key areas on the front and back straps and redistribution of mass provided by the accessory rail noticeably decrease the perceived recoil from standard 75 models and allow for more rapid target acquisition and transition.

The SP-01 was designed as a military and law enforcement duty sidearm and is currently in use by security forces fighting in the global war on terror. Thanks to its exceptional accuracy and superior handling characteristics, the CZ 75 SP-01 has also found a following in the field of sport and target shooting. Its list of users on the competition circuit include world champions Adam Tyr and Augie Hobdell (1st and 3rd place respectively in 2005’s IPSC championship, World Shoot XIV).

MODEL VARIANTS:
• 75 SP-01 Tactical .40 S&W - Ambidextrous disconnector lever
• 75 SP-01 Tactical .40 S&W - Ambidextrous disconnector lever

FULL-SIZE .45 ACP

CZ 2075 RAMI
The CZ 2075 RAMI is a sub-compact semi-automatic based on the proven CZ 75 line of pistols. Just like the 75, the RAMI is double action/single action, allowing it to be carried in different conditions depending on the shooter’s preferences. Several safety devices are used including a firing pin block and a manual safety.

Incorporating the CZ double-stack magazine design, the little RAMI ships with a 10-round flush-mount magazine and 14-round extended magazine in the 8mm Luger version, or 7- and 9-round magazines in .45 S&W. A low capacity-compliant version of the 9mm is available with 2-10 round magazines.

With a 3-inch barrel and an unloaded weight of less than 26 ounces, the black polycoat, alloy-framed RAMI is ideal for concealed carry.

MODEL VARIANTS:
• 2075 RAMI .40 S&W
• 2075 RAMI BD - Decocking lever instead of safety

CZ 97 FEATURES

• .45 ACP
• SA/DA action
• All steel construction
• Front and rear slide serrations
• Extended beavertail
• Loaded chamber indicator
• Double stack 10-round magazine
• Thin aluminum grips

CZ 97 B

The CZ 97 B is the big-bore brother to the CZ 75 B, the first CZ pistol produced in .45 ACP. It is operationally identical to the 75 B (SA/DA, firing pin block safety and magazine brake). Features include a screw-in barrel bushing, loaded chamber indicator and a double-stack magazine holding 10 rounds. The 97 B sports thin aluminum grips and fiber optic front/two-dot rear sights and is finished in black polycoat.

MODEL VARIANTS:
• 97 BD - Equipped with a decocking lever and tritium sights

SUB-COMPACT

CZ 2075 RAMI

MODEL VARIANTS:

CZ P-09

The P-09 is our full-size polymer offering, boasting an impressive 19+1 capacity in its flush-fitting magazine – unsurpassed by any other 9mm service pistol. Featuring the versatile Omega trigger system, the P-09 is shipped with decockers installed but can easily be converted to a manual safety with the supplied parts and instructions. Also included are small, medium and large backstraps that allow the user to customize the pistol’s grip to their hand while retaining the natural point of aim that CZ handguns are known for. With an integrated 1913 Picatinny rail, the P-09 is readily adaptable to low-light situations. The Omega DA/SA trigger provides crisp single action trigger break, while providing the safety of a DA first-pull option. The flat dark earth-framed version also has Tritium night sights.

Model Caliber Magazine Capacity Overall Length Weight Trigger Sights Safety Elements
CZ P-09 9mm Luger 19 polymer 205 | 8.1 115 | 4.53 147 | 5.79 37 | 1.46 1.85 | 840 SA/DA FNS Ambidextrous Safety or Decocker, Fixed Night Sights

CZ P-07

The CZ P-07 is the updated version of the CZ 75 P-07 Duty. The debut of the full-size P-07 two years ago brought refined lines and interchangeable backstraps to our polymer Omega line. The compact-sized P-07 followed suit, with a number of improvements and a nitrided slide finish that wears longer and has increased corrosion resistance. The pistol as a whole was dehorned, removing any sharp edges to make it more comfortable for all-day carry.

Like the P-09, the P-07’s safety and decockers are interchangeable with a few minutes and minimal tools. Add to that small, medium and large backstraps and an integrated 1913 Picatinny rail on the dust cover and the P-07 is adaptable to the shooter and their needs, from service pistol to bedside protector to the envy of the shooting range.

The P-07 shares the P-09’s updated trigger shape which is more comfortable for long days at the range, as well as its snag-free hammer and forward cocking serrations. Metal 3-dot sights and a beefed up magazine spring round out the bevy of updates, resulting in the best P-07 we’ve had to date.

ADJ - adjustable, F - fixed, SA - single action, DA - double action, FNS - Fixed Night Sights
When it comes to tuned competition CZs, there’s no one that builds more of them each year than Angus Hobdell, owner of CZ Custom. Angus has been building pistols for us for the better part of a decade, with his shop becoming the de-facto CZ-USA custom pistol shop. Each year we partner with him to build a handful of models that combine the best parts available to meet the varying needs and budgets of competitive shooters. Check out CZ Custom at www.czcustom.com.

### CZ 75 COMPACT SDP
Starting with the lightweight P-01, Angus’s crew installs a competition hammer modified to work with the decocker, polishes and smoothes the firing pin block and tunes the trigger to 3.0-4 lbs. in SA and 7.5-8.5 lbs in DA. Riding atop the slide are tritium sights with a Heinie® Slant Pro in the rear for a snag free profile. Custom interior parts like an CZC 85 combat trigger, solid firing pin stop and trigger pin, extended firing pin and a stainless steel guide rod complete the package.

**CAL:** 9mm Luger  
**FINISH:** Black polycoat

### CZ 75 SP-01 SHADOW TARGET II
The Target II is a competition-ready Pre-B style SP-01 Shadow, featuring a CZ Custom trigger job with the new short reset single-action trigger, fully-adjustable rear sight, fiber optic front sight, stainless steel guide rod, lighter springs for competition (11 lbs recoil and 13 lbs main springs), extended magazine release, drop-free magazines and checkered aluminum grips. Created by champion shooter Angus Hobdell’s CZ Custom Shop to have trigger pulls of 3.0-4.0 lbs in SA and 7.5-8.5 lbs in DA.

**CAL:** 9mm Luger  
**FINISH:** Black polycoat

### CZ 75 SHADOW TAC II
Our latest custom shop model, this defensive pistol has a tuned trigger system with a shorter single-action reset and a Pre-B style slide. The Tac II features a CZ Custom plain black anodized Combat II slide, Trijicon® Tritium front sight, factory 85 Combat trigger, is sprung lighter (14 lbs recoil and 13 lbs main springs), extended magazine release, drop-free magazines and a stainless steel guide rod. The resulting trigger pull is 3.0-4.0 lbs in SA and 7.5-8.5 lbs in DA. Features are rounded out with a short dust cover, high-rise beavertail, and checkered aluminum grips.

**CAL:** 9mm Luger  
**FINISH:** Black polycoat

CZ CZECHMATE

The CZECHMATE is based on a modified version of the CZ 75 TS frame. It comes with all parts necessary to run in IPSC Open or Limited division (both in 9mm). The CZECHMATE comes configured for Open division competition with a compensator and C-MORE® red dot sight installed. A spare barrel is included along with a front sight adapter that replaces the compensator and a rear sight to replace the slide racker handle when switching from Open to Limited configuration. A big stick 26-round magazine and three 20-round magazines are included in the hard case.

CAL: 9mm Luger
FINISH: Black polycoat

CZECHMATE FEATURES

• C-MORE® Slide Ride non-click 6 MOA
• Reversible slide racker
• Three 20-round magazines
• One 26-round magazine
• 4-port compensator for use with major power factor ammunition
• Aluminum grips
• Aluminum magwell
• Competition hammer
• 2 slide stops with slide lock
• 4 slide stop pins without slide lock
• Undercut trigger guard and beavertail for high grip
• Spare barrel for use without compensator, fitted and serialized to match gun

CZ 75 TACTICAL SPORT

Introduced in 2009, the CZ 75 Tactical Sport in 9mm Luger and .40 S&W is a competition-ready pistol designed for IPSC standard division (USPSA® limited division). The weight and balance of the CZ 75 TS are optimized for the rapid, accurate style of shooting necessary for success in practical shooting disciplines. The Tactical Sport model is the next generation of the proven CZ 75 Standard IPSC. The TS retains all of the best features of Standard IPSC model and improves upon the platform with increased durability, new sights, a new trigger system and more.

The TS features a full-length dust cover, a 5.4” barrel (.7” longer than the CZ 75 B) as well as a slightly larger grip to accommodate the higher capacity heavy-duty magazine. Other features include a fixed rear sight, ambidextrous safety, extended magazine release, SA trigger, checkered front and rear strap and a gaping magazine well for fast magazine changes.

CAL: 9mm Luger
FINISH: Dual tone (nickel frame/blue side)

ADJ - adjustable, F - fixed, FO - fiber optic front sight, SA - single action, DA - double action * Interchangeable fixed or optical
Dan Wesson has long been known for quality, durability and ingenuity with our revolvers. Today, we bring the same attention to detail to our 1911s. With a decade of 1911 production, we’ve perfected the craft.

We produce only a few thousand handguns a year, using the best components and finishes the industry has to offer. We painstakingly hand-fit and polish each and every part, creating the best possible production 1911. Even a custom pistol maker would be hard-pressed to build a gun that would out-perform ours straight out of the box. No matter the model, from our entry-level Heritage to our flagship Valor, we are proud to provide our customers the “Best Bang for the Buck” in the industry.

All our pistols share the same match-grade components but specific features vary by model. All of our black guns start out in stainless and are coated in our Duty finish, a revolutionary treatment process that actually bonds to the components and creates a super-durable matte black skin. Our Duty finish beats any of the spray-and-bake finishes most companies use today, hands down. Our durability testing proves it and our customers love it – which is proof enough for us!

On the off chance you might need to speak to customer service, our knowledgeable and courteous service department is second to none. We invite you to find another production 1911 in our price range that gives you everything Dan Wesson has to offer.

**DW SILVERBACK**

The Silverback is currently the only dual-tone 1911 in the Dan Wesson line. The stainless slide with polished flats features adjustable target style tritium sights, serrated top rib and tail cuts on the dust cover. The stainless frame is finished in our Duty black nitride finish and completed with G10 full thickness grips. The Silverback is built to the same tolerances and finished to the same levels as the Dan Wesson flagship Valor series.

**DW VALKYRIE**

The Valkyrie is a variation on the CCO (commander-length slide on an officer frame) This gun features all the latest upgrades to the CCO platform including our ECO frame with a recessed slide stop hole paired with ball cuts on the slide’s dust cover and carry cuts up front. Along with slim G10 grips, it utilizes the same sights and controls of the Dan Wesson ECO with the barrel and bushing of the Dan Wesson CCO.
The Specialist is one of the newer additions to the Dan Wesson stable. When police departments approached us to build them a more reliable, durable 1911 to replace the ones they had been carrying, we developed a model just for them. The additions that made it ideal for law enforcement also made it perfect for home defense, so we gladly offered it for sale to the public.

A full-size 1911, the Specialist is chambered in .45 ACP and loaded with features to satisfy a public servant’s special requirements. The forged stainless steel slide wears our popular Clark-style serrated rib with a single amber tritium dot in the rear sight and a green lamp with white target ring in front. The frame sports an integral 1913 Picatinny, 25 LPI front strap checkering, undercut trigger guard and recessed slide stop to enable the installation of laser grips. Equipped with an ambidextrous thumb safety, extended magazine release and detachable two-piece magwell, the Specialist is operator-friendly. It is finished off with a set of G10 grips that guide the hand into the beavertail and hold it there. The Specialist ships with two 8-round magazines with bump pads and is available in either a matte stainless finish or our black Duty finish, which makes for an especially hardy pistol that scoffs at everyday wear and tear.

**Model Variant:**
- **Specialist Black** - Black Duty finish

---

**DW VALOR**

The Valor series is our flagship line, meaning it is the best we have to offer. Frankly, we feel it is the best built production 1911 on the market. The Valor series features a forged frame with 25 LPI checkering front and back, an undercut trigger guard, tactical night sights, VZ® slim-line G10 grips, as well as our forged steel fire controls and other premium small parts. Every piece that goes into the Valor series is hand fit, polished and blended to provide you with not only the best functioning gun we can provide, but also the best looking.

Available in 5-inch Government and 4.25-inch Bobtail® Commander versions, the Valor can be finished in either a matte glass bead stainless or our super-durable black Duty finish. We set out to deliver the ultimate defensive 1911 and the Valor is exactly that. It delivers everything you need and nothing you don’t.

**Model Variants:**
- **Valor** Stainless - stainless finish, black G10 grips
- **V-Bob** Stainless - stainless finish, black G10 grips
- **V-Bob Black** - hard black Duty finish, double diamond black / grey G10 grips

*Ed Brown Bobtail®

**CAL:** .45 ACP  **Finish:** Black Duty finish

---

**DW POINTMAN NINE PM-9**

The Pointman Nine is the only full-size Dan Wesson model chambered in 9mm. We have offered this model in limited quantities in the past and demand always outpaces production capacity. This gun features our serrated rib on top of the forged slide with an adjustable target sight in the rear and fiber optic sights in the front and front and rear cocking serrations. The frame is forged stainless with an undercut trigger guard and 25 LPI front strip checkering. The flats are polished to a soft brushed finish and the rounds are sandblasted for a nice contrast. Double diamond cocobolo grips finish it off. With the lower cost of 9mm ammunition and mild recoil, this is the perfect model for getting acquainted with the 1911. Holding 9+1 rounds, the PM-9 shines both at the range and in competition.

**Model Variant:**
- **Pointman Seven** .45 ACP

---

**DW SPECIALIST**

**CAL:** .45 ACP  **Finish:** Matte stainless steel

**Model Variant:**
- **Specialist Black** - Black Duty finish
DAN WESSON

DAN WESSON RAZORBACK RZ-10
Our Razorback has always been our most popular 10mm platform. The RZ-10 is a 5” 1911 and features the serrated target rib machined on the top of the slide with fixed defensive sights. We fit a match grade ramped barrel for use of the most popular 10mm loads and smoother feeding. The slide is marked to our standard forged frame with undercut trigger guard and smooth front strap. On both the frame and the slide we polish the flats to a soft brushed finish and sandblast the rounds. The gun is finished off with a nice set of double diamond cocobolo grips.

CAL: .10mm FINISH: Stainless steel

DAN WESSON HERITAGE RZ-45
The Heritage is our entry-level 1911, allowing shooters to experience Dan Wesson quality at the most affordable price possible. Even though this model is our most economical, it features all the same quality components that we use in our 1911 models. A Government-size model, it has a 5-inch barrel and is chambered in .45 ACP. The slide features our serrated rib and wears a tritium front sight and plain black, snag-free rear. The sides of the slides have a nice brushed polish on the flats while the rounds are sandblasted to match the matte forged frame with undercut trigger guard and smooth front strap. Grips are rubber Double Diamonds by Hogue®. The Heritage is a great introduction to the Dan Wesson 1911 experience and we are confident it will become an heirloom, handed down from generation to generation.

CAL: .45 ACP FINISH: Stainless steel

DAN WESSON GUARDIAN
We’ve had many requests to produce a Commander-sized 1911 in 9mm. In response, we’ve revived one of the early Dan Wesson 1911 models with a twist… We have combined the best features from two of our most popular models, the Bobtail® Commander and the CCO. The new Guardian has an anodized aluminum bobtail frame and an aluminum mainspring housing to help reduce printing when carrying concealed and make it comfortable enough for full-time carry. The black Duty finished Commander-length slide and alloy frame give it just the right feel and balance. If you are looking for a lightweight Commander-sized 1911 in 9mm, .38 Super or .45 ACP, don’t pass up the Guardian.

* Ed Brown Bobtail®
MODEL VARIANT:
• Guardian 9mm Luger
• Guardian .38 Super
• Commander Classic Bobtail® Walnut grips, stainless frame and finish

DAN WESSON

I’ve hunted with the 10mm-auto handgun for 19 years and I have taken many animals. Five years ago I shot my first Dan Wesson Razorback 10mm and fell in love before the first magazine was empty. Its amazing accuracy and natural feel was undeniable and unlike any other 10mm I have shot. It was clear as day that the Razorback was a true precision hunting tool that expanded my range and accuracy tremendously.

Since that day five years ago, I have hunted and killed close to 40 animals including huge elk, nilgai antelope, whitetail, hogs, antelope, turkey, axis deer, sheep, etc. with the Dan Wesson Razorback 10mm. It’s my favorite gun to hunt with.” -Razor Dobbs

CAL: .10mm FINISH: Stainless steel

DAN WESSON

CAL: .45 ACP FINISH: Black Duty finish/Black anodized

DAN WESSON

CAL: .45 ACP FINISH: Stainless steel
**DW CCO**

Our Guardian has proven so popular due to its concealable profile and Commander-length slide that we look at a step further with the CCO – the Concealed Carry Officer – a Commander slide on an Officer frame. With the proven stopping power of the .45 ACP and 7+1 capacity, you won’t be under-gunned. To make it disappear more easily while carrying concealed, we bolusted the back of the mainspring housing. To reduce overall weight, the frame and mainspring housing are made from anodized aluminum. We included an undercut trigger guard and our “chain-link” grip treatment on the front strap and mainspring housing to help control recoil and give it a distinctive look.

The slide and small parts are treated in the same Duty finish that we use on all of our black guns. We fitted dual-colored Tritium lamps for faster low-light target acquisition. The front ramp of the slide is rounded out with our stippled shadow grips. Like all Dan Wesson models, this gun is both beautiful and functional.

**DW ECO**

There has never been a higher demand for self defense handguns than there is today. The greatest demand is for the smallest, lightest gun available, but with those come drawbacks. Generally, these guns are difficult to shoot accurately, lack stopping power and recoil can be a problem. If you can’t hit or stop what you are shooting at, what good is the handgun? We can understand all of these concerns as we face them every day as well. We wanted to give our customers the smallest, lightest gun we could without sacrificing accuracy, dependability and stopping power.

Enter the ECO – a single stack Officer size 1911 that weighs in at only 25 oz. For years, the Officer model has been criticized for reliability. We have conquered that by using the latest technology and doing what others say can’t be done. The recoil system is quite unique for this style 1911 as we use a solid one piece guide rod and a full recoil spring that is rated for 15,000 rounds in .45 ACP. 30,000 round No 920 like most 1911 dual recoil systems are rated for. That is longevity unheard of in a production 1911. It also gives the benefit of a smooth slide for easier operation and less felt recoil.

The lightweight 3.5-inch slide is topped with Tritium night sights with our tactical rear, which allows for easy one hand racking. The ECO barrel is a Flash-out, ramped bull barrel with a target crown rather than the traditional barrel bushing setup, allowing it to be more compact and easier to disassemble.

Trigger pull is short and crisp at 4 lbs., just like all our 1911s. It breaks cleanly, enabling the accuracy people have come to expect from a Dan Wesson. The frame is anodized aluminum and features an undercut trigger guard and 25 LPI checkering. The mainspring housing is also aluminum with 25 LPI checkering and a rounded bottom corner for concealability and shooting comfort. The enhanced grip safety and our new slim-line D1 grips neatly plant the pistol in your hand, allowing for faster follow-up shots and better recoil control. Just like the Guardian, the ECO’s slide and small parts receive the Duty finish and it’s available in both 9mm and .45 ACP.

We set out to conquer the Officer model and did just that. The ECO is compact, extremely lightweight and raises the bar for reliability. Pack up an ECO – you won’t be disappointed.

**MODEL VARIANT:**

- **ECO** .45 ACP

---

**DAN WESSON 715**

The 715 is as it was before — designed and built to be the most accurate, rugged and versatile revolver on the market. Shipped with a 6” barrel, the new 1911 frame is designated the EVO, a heavy-walled浏览文档内容，提炼出其中的关键信息和数据。
DAN WESSON

ELITE SERIES

The Elite Series of 1911’s is designed to meet and exceed the expectations of the most demanding competitive and combat shooters. Each model in the Elite line was purpose-built knowing the demands that are placed on these handguns. Every part and component was carefully chosen based on supreme quality and thorough testing. Each is meticulously hand fit, followed by a rigorous function and reliability regimen. What you get are handguns of unparalleled accuracy, rugged reliability and flawless functionality.

TITAN

Turning the most well-known defensive pistol in the world into a true combat handgun was no easy task. Melding caliber and capacity, the Titan is chambered in the monstrous 10mm cartridge, delivering more foot pounds of energy than a .45 ACP and packing 14 rounds in the magazine, putting to rest the capacity debate. Sight configuration was imperative – the Titan has rugged HD night sights that are moved forward and recessed deep into the slide, yielding target accuracy and extreme durability. Securing the pistol to your hand are the custom G-10 grips, 25 LPI checkering and snake scale serrations on the slide, keeping the Titan planted in the harshest of conditions. The combination of all-steel frame, bull barrel and tactical rail gives the Titan balance and durability, resulting in the most formidable target-grade combat handgun on the market.

CAL: 10mm Auto
FINISH: Matte black

CHAOS

This double-stack 9mm is for competitors who don’t have to worry about a power factor requirement such as in 3-Gun. Built to tackle the rigors of the sport, the Chaos has 21+1 rounds on tap. Like all of our Elite Series Dan Wessons, it is hand built on a double-stack 1911 frame and tuned to perfection. With high capacity, superbly crisp trigger and flawless reliability, the Chaos truly does reign supreme.

CAL: 9mm Luger
FINISH: Matte black

MAYHEM

Built for the Limited IPSC/USPSA® division as well as anyone after a superbly accurate target-grade 1911, the Mayhem is ready to shake things up. Built on our high-capacity steel 1911 frame, we’ve shaved weight from where you don’t want it and added it to where you do. The 6-inch bull barrel and tactical rail add static “good weight.” The 5-inch long slide gives an edge on sight radius and pointability, but lightened to equal the weight of a 5-inch. The result speaks volumes, with a gun that balances and feels like a Government-size model but points and shoots like a long-slide. The all-steel frame and industry-leading parts deliver the most well-balanced, softest-shooting 6-inch Limited gun on the market.

CAL: .40 S&W
FINISH: Matte black

HAVOC

The Havoc is designed to be the most well-balanced, softest-shooting Open gun on the market. Built on an all-steel, hi-capacity version of the 1911 frame, it is fitted with industry-leading parts including a barrel and compensator that combine the highest level of accuracy with the most effective compensation available. The C-More® red dot allows for extremely fast target acquisition with its ultra-low mounting configuration. The Havoc is a handgun made for shooters by shooters, ready to dominate Open IPSC/USPSA® division.

CAL: 9mm Luger
FINISH: Matte black

MODEL VARIANT:
• HAVOC .38 Super

Limited Availability – The Dan Wesson Elite series typically sells out in the first few months of the year. Lead times of 6 months can be expected on these limited production models.
CZ rifles have long been known for their accuracy. This fact is in large part due to our barrels. Though it’s only one part of the equation, our barrels undergo a rather unique transformation before making it to the rifle. Starting as cylindrical steel billets, the barrels sit outside in stacks – getting rained on, snowed on and baking in the sun. For as long as two years, the forces of nature act on the metal, relieving the stresses created when the billets were made.

Once the aging has completed, they head into the factory where they are rifle drilled and bored, then cold hammer forged. Massive rotary hammers reshape the steel, squeezing it around a hardened mandrel that runs down the inside of the barrel, leaving its reverse image imprinted in the bore – the lands and grooves of rifling.

Hydraulically lapped at the factory, our barrels need no ‘break-in.’ Any burrs or irregularities that might catch the bullet jacket and create copper fouling have already been polished away by the time the barrel is fit to the rifle.

The resulting barrels have built a reputation for accuracy, whether in the rimfire 455 platform or the highly-prestiged Ultimate Hunting Rifle.
CZ 455

The CZ 455 sets a new standard for affordable rimfire bolt-guns. Drawing from a long lineage of Czech rifles, the 455 uses the same cold hammer forged barrels that allowed CZ to dominate competitions across the nation. The 455 platform uses an interchangeable barrel system, where a user can swap from one chambering to another quickly and easily. Additionally, actions can be swapped into any 455 stock without modifications. This means a 455 FS in .22 LR can be converted into a Varmint Precision Trainer with the addition of a stock and a barrel kit. Five minutes and the included tools are all it takes to do the swap. It’s the ultimate bolt-action rimfire platform.

CZ 455 MAIN FEATURES

- Action fully machined from bar stock
- Trigger adjustable for weight of pull
- Cold hammer forged barrel
- Detachable magazine
- Standard 1mm dovetail milled into receiver
- Interchangeable barrels
- Interchangeable stocks

The rimfire rifles produced by Česká Zbrojovka Uherský Brod are among the most sought after firearms in the world.

Check out our website for the latest developments in the CZ 455 product line.

CZ 455 VARMINT THUMBHOLE FLUTED

This 455 Varmint Thumbhole is one classy rifle. A nutmeg-colored laminate, its stock is impressively ergonomic. The unique barreled uses the .866-inch profile of our 455 Varmint barrels, but is heavily fluted to take some weight out. While the real-shooting ability of a fluted barrel isn’t as important in a .22 LR, it definitely makes for a good-looking rifle.

Cal: .22 LR | Stock / Finish: Nutmeg laminate / blue

CZ 455 ULTRA LUX

Our longest-barreled rifle, the Ultra Lux, joins the 455 platform this year. It retains all the same features as its 452 predecessor, including 28.6” barrel, tangent rear sight (adjustable for elevation), beech stock with cheekpiece and 10-round magazine. Just like the 455, it now has the ability to swap barrels and stocks. The largest draw of the Ultra Lux has always been its incredibly long sight radius, which makes it easier to be more accurate when using iron sights.

Cal: .22 LR | Stock / Finish: Beechwood / blue

CZ 455 AMERICAN SYNTHETIC SUPPRESSOR-READY

Perfect for quiet plinking, the 455 American Suppressor-Ready has a 16.5” barrel that is threaded at the factory to fit muzzle devices and suppressors with 1/2"x28 threads. Its black synthetic stock has a soft-touch finish and is patterned in the American style with a high, flat comb intended for use with a scope.

Cal: .22 LR | Stock / Finish: Synthetic / blue

MODEL VARIANTS:

- CZ 455 American Synthetic, 20.5” sporter barrel, .22 LR
- CZ 455 American Walnut, Turkish walnut stock, 20.5” sporter barrel, .22 LR, .17 HMR, and .22 WMR

ADJ–adjustable, F–fixed, D–detachable, HF–hammer forged
The 455 American is also available in a money saving set that includes barrels in both .22 LR and .17 HMR as well as the tools, parts and magazines to convert the rifle back and forth between the two calibers.

**CAL:** .22 LR and .17 HMR

**STOCK/FINISH:** Walnut/Blue

Additional barrel kits for the 455 are available in our webstore at shop.cz-usa.com.

**CZ 455 VARMINT**

Our heavy-barreled version of the 455, the Varmint has a .866" cylindrical barrel. Not only does the heavy barrel make for good harmonics, it also allows the Varmint to perform well with a wide variety of rimfire loads, translating into an accurate platform for shooting targets or getting game. The Turkish walnut stock has an American-style comb for use with a scope and a wide, flat forend that rides a sandbag well.

**CAL:** .22 LR, .17 HMR, .22 WMR

**STOCK/FINISH:** Walnut/Blue

**CZ 455 VARMINT EVOLUTION®**

The Evolution® stock in the “Sky” blue/grey color combination has a radical design made possible through the increased strength of hardwood laminates. While the bolt is on the right hand side, the stock design is fully ambidextrous including the cheekpiece, handpistol grip and palm swell. The extreme free float provided by the Evolution® stock design ensures the realization of the full target potential of the 455 Varmint platform. The 455 Varmint along with the Evolution® stock will accept any of the accessory barrels available for the 455 platform including the American and Lux (open sights) as well as other varmint weight barrels in any available carbon fiber magazine included.

**CAL:** .22 LR, .17 HMR

**STOCK/FINISH:** Sky Laminate/Blue

**CZ 455 VARMINT PRECISION TRAINER**

The 455 Precision Trainer was designed to provide the same look and feel as a full-size tactical rifle while allowing for more economical training. Using a Manners Composite T4 stock to provide a rock-solid platform, the Precision Trainer wears a new camouflage paint scheme this year. The stock itself has multiple layers of carbon fiber and fiberglass hand-laid in high temperature epoxy resins, then placed in a vacuum and heat-cured to create the perfect resin-to-fabric ratio. Combined with the 455’s .866" cylindrical heavy barrel, that makes the Precision Trainer a surgical paper-puncher.

**CAL:** .22 LR

**STOCK/FINISH:** Camo Composite/Blue

**ADJ–adjustable, F–/fixed, D–detachable, HF–hammer forged**
**RIMFIRE RIFLES**

**CZ 455 LUX**
The 455 Lux has a Turkish walnut stock and open sights that are adjustable for windage and elevation. Like all 455s, it has an 11mm dovetail for mounting optics, though the stock profile is ideal for use with open sights. One 5-round magazine is included.

**CZ 455 FS**
Fitted into a Mauser-style Turkish walnut stock, the FS sports the same adjustable open sights as the Lux and comes with one 5-round magazine. Using the same barrel sets as the Lux, the FS can be swapped between all three chamberings with five minutes and only the tools included with the barrel kits.

**CZ 455 TRAINING RIFLE**
Our incredibly popular Training Rifle has finally made it to the 455 platform. The 455 Training Rifle shares the same popular features of its predecessor – it has the same 24.8” barrel, tangent rear sight (adjustable for distance) and beechwood stock with Schnabel forend. The Training Rifle adds a .17 HMR chambering.

**CZ 452 AMERICAN LEFT-HAND (LIMITED PRODUCTION)**
Though most models of the 452 have transitioned to the 455 platform, the left-handed version of the American is one that continues to be made on the 452 action. CZ 452s are available. For 2015 the Training Rifle adds a .17 HMR chambering.

**CZ 452 SCOUT**
The Scout is a compact rimfire rifle with a 13-inch length of pull for young shooters. Its shortened dimensions, reduced weight and single round loading device make it a perfect first rifle for any boy or girl. The single round loading device helps teach ammo conservation and marksmanship. The rifle features adjustable open sights and an 11mm dovetail for mounting optics. Though rifles are delivered with a single shot adapter, any of the .22 LR CZ 452 magazines including both the 5 and 10 round versions will fit the Scout and are available separately.

**CZ 512 SEMI-AUTO**
The CZ 512’s action is comprised of an aluminum alloy upper receiver, which secures the barrel and bolt assembly, and a fiberglass-reinforced polymer lower half that houses the trigger mechanism and the magazine well. The modular design is easily maintained, requiring only a coin as a tool for field stripping. Shoring magazines and scope rings with the CZ 455, the 512 makes the perfect companion to your bolt-action rifle.

**AZ/CA/CO/CT/DE/FL/GA/HI/ID/IL/IN/KS/LA/ME/MD/MA/MI/MS/IA/SC/TX/UT/VA/VT/WI/WY**

- 5-shot, 222 Rem, RIMFIRE RIFLES
For 2015, all of our 527s in .223 Rem. go to a faster twist rate. With such a small action, even longer-barreled Varmint models seem to differentiate between the two. Built to CIP specifications, our 7.62x39 chambers are ideal for shooting steel-cased surplus ammo. Designed to shoot .311 bullets, some American brass ammo may not perform as well as the imported steel-cased variety, because of SAAMI brass dimensions and varying bullet diameters.

**CZ 527 MAIN FEATURES**
- True micro-length Mauser-style action
- Controlled round feed
- Hammer forged barrel
- Single set trigger
- Detachable magazine
- 16mm scope dovetails milled into the action
- Left-hand versions available in some calibers
- Because they are built to CIP spec, all CZ .223s are built to fire 5.56 ammunition. CIP spec doesn’t differentiate between the two.

**CZ 527 CARBINE**
The Carbine is an intermediate-range “brush gun.” Weighing in at less than 6 lbs, this handy rifle has a straight comb walnut stock and open sights. Our only-model chambered in 7.62x39, it combines low recoil with effectiveness on medium-sized game such as deer and wild bear, making it ideal for younger shooters. Both chamberings offered in the Carbine are economical to shoot given their service rifle heritage and the availability of surplus ammunition.

**CZ 527 YOUTH CARBINE**
Our incredibly popular 527 Carbine now has a youth variant. Though the action and barrel stay the same, the Turkish Walnut stock has been shrunk in nearly every dimension. With a 12.75” length of pull, smaller pistol grip with tighter radius and a thinner forend, the youth Carbine makes an ideal first deer rifle. Chambered in .223 and 7.62x39, both cartridges are more than capable of taking down wild game and deliver little recoil compared to many youth offerings on the market. Paired with our smooth micro-Mauser action and single set trigger, a standard Carbine stock can be added as the shooter grows, as its small size won’t relegate it to the back of the safe a few years down the road.

**CZ 527 VARMINT THUMBHOLE**
The CZ 527 Varmint has a heavy 24” hammer forged barrel and two stock options. The rifle can be equipped with a walnut American-style stock or a grey laminate stock with palm swell and wide forearm for use on a forward rest. The Varmint retains all of the features that made the 527 famous, from its controlled round feed and claw extractor to its single set trigger and hammer forged barrel. Scope moun ts are integrated into a forged, square bridge receiver (rings not included), and the rifle comes with a 5-round detachable box magazine.

**NEW**
A lifetime of hunting will expose you to a multitude of situations. You will be presented with fleeting opportunities that require a quick shot and when hunting dangerous game you must be prepared for the kill or death shot to stop a charge. On the other hand, most shots will give you the opportunity to shoot from a more stable position such as a rest, shooting sticks or a practiced kneeling or prone position. The CZ single set trigger (SST) system provides the shooter with the options to effectively handle any shooting situation they are presented with.

The SST allows for both a standard hunting trigger and a lighter target trigger for the shooter with the options to effectively handle any shooting situation they are presented with. The SST always breaks like glass. Many shooters will tell you that the single set trigger and over-travel. The set trigger function is only adjustable for weight, but the target trigger mode is set. The standard trigger is adjustable for weight, creep and over-travel. The set trigger function is only adjustable for weight, but always breaks like glass. Many shooters will tell you that the single set trigger is a better aid to accuracy than a thousand dollar scope.

**CZ SST “Perfect Pull” Trigger Adjustment**

**DISCLAIMER:** Do not attempt to adjust triggers unless you are confident in your ability to follow instructions for adjustments and safe operation.

Tools required: 6mm wrench, 7mm wrench, one very small and one large common flathead screwdriver

- Make sure magazine and chamber are empty.
- Remove the stock from the barrel action.
- Cock the rifle, then adjust screws “B” in until it feels and back off 1/4 turn.
- Loosen locking nut and remove screw “C” to allow easy access to screw “A”
- Adjust screw “A” to desired poundage and tighten the lock nut (ensuring that the screw position does not change).
- Replace screw “C,” turn it all the way in, then back it out while pulling trigger until it feels. Then back out an additional 1/4 turn and tighten the lock nut for screw “C” (ensuring that the screw position does not change).

Set Trigger Adjustment and Operation:

To adjust the set trigger weight, adjust screw “D” in to lighten and out to make heavier. If you prefer to completely disable the set function, turn screws “D” all the way in until the rifle feels, then back off 1/4 turn.

This process will get you very close to the best trigger pull possible with only slight adjustments needed, if any, to get it to the “Perfect Pull” for you.

An activated set trigger is very sensitive to shock and during handling could unintentionally discharge if the set trigger is adjusted with too little travel. The safety of the SST adjustment can be checked with the rifle unloaded by repeated opening and closing of the bolt combined with moving of the safety to the “ON” and “OFF” positions in both set and unset modes. If the set trigger adjustment engagement screw (“D”) is too light, it will go off when doing this. In this case, add more travel to the set trigger adjustment until it does not unintentionally go off.

For safety, activate the set-trigger only after the rifle is loaded and when in position for the shot with safety in the off position. Do not carry your rifle with an activated set-trigger! If you have activated the set-trigger and you do not immediately take the shot, keep your firearm pointed in a safe direction and activate the safety, then squeeze the trigger to deactivate the set feature.

**CZ 527 AMERICAN**

The CZ 527 American features a classic American pattern stock, a sporter-weight hammer forged barrel, a single set trigger and a recessed target crown. Made to be used with optics, this rifle ships with 1-inch steel scope rings. For 2015, all CZs in .223 Rem. ship with 1/8” barrel twist for most bullets to 70 grains.

**MODEL VARIANT:**
- CZ 527 American: Left-hand, available in .223 Rem. and .243 W

**CZ 527 M1 AMERICAN SYNTHETIC**

The M1 improves on the aesthetics and ergonomics of the 527 American with a redespun trigger guard and flush 13/16” round detachable magazine. 2015 brings a faster 1/18 twist for .223 Rem.

**MODEL VARIANT:**
- CZ 527 M1 American: Synthetic

</tbody>
</table>
CZ’s newest centerfire offering, the 557 is a departure from the Mauser-style bolt found on CZ’s 550 models. Instead, it has a short extractor and plunger-style ejector for smooth operation and enhanced ejection. The short extractor or “push feed” system also makes it easier to single load the rifle, which many shooters prefer for range work. The new receiver is machined from steel billet and has CZ’s integral 19mm dovetails for mounting a scope. Equipped with a 2-position safety, the bolt can be cycled while the rifle is on ‘Safe.’ Top it off, it comes with a fully adjustable trigger that allows the owner to tune weight, creep and overtravel to their liking. Clad in an American-style walnut stock, the new action is paired with CZ’s legendary cold hammer-forged, factory-lapped barrel. The resulting rifle is destined to become a treasured hunting companion.

CZ 550

**CZ 550 FS**
The 550 FS is filled with a classic Bavarian-style Mannlicher stock with steel muzzle cap. While the aesthetics of this model might remind us of rifles from times gone by, it (a short) 20.6-inch barrel, fast-handling stock and iron sights are ideal for the quick shots required while hunting in dense cover.

Unique to the 550 FS and Composite Carbine models is the three-position safety. Fully rearward is ‘safe.’ Fully forward is ready to fire, but the middle position allows the bolt to be cycled for unloading while remaining on ‘safe.’

**CZ 550 COMPOSITE CARBINE**

The 550 Carbine is a versatile platform that adapts easily to the variety of hunting methods and locations the traveling hunter is exposed to when pursuing species across the globe. With its 20.6-inch barrel, it is compact enough to easily maneuver in a blind or hop out of a safari vehicle. The American-pattern Aramid composite stock is ultra stable, with a full-length aluminum bedding block.

**CZ 550 ULTIMATE HUNTING RIFLE**

The CZ Ultimate Hunting Rifle (UHR) is a CZ 550-based rifle in .300 Winchester Magnum that comes in all 8 Bbcs and includes a minute of angle accuracy guarantee to 600 yards. By maintaining quality control standards unheard of in the industry, the UHR delivers a level of accuracy formerly only available from high-end custom rifle gunsmiths.

The UHR allows the hunter to realize the full potential of the components in their rifle system. By guaranteeing that the rifle itself is very accurate, the only variables left in the system are the optics, ammo and ability of the hunter. Keeping in mind the UHR is the foundation of a shooting system capable of extreme precision, a new scope mounting system is included with the rifle that matches the abilities of the rifle. Machined from a single piece of aluminum with rings for 30mm scope tubes, it provides solid and precise attachment.

When combined with quality ammunition, optics and practice, the UHR can significantly extend a shooter’s effective range.

**MODEL VARIANTS:**

- **STOCK / FINISH :** Aramid composite stock
- **CAL :** .300 Win. Mag.
CZ WESTERN SERIES

CZ 550 BADLANDS

Energy - and a lot of it. It’s a real asset when taking big game like elk and bison at longer distances. Our new Badlands is the ideal rifle for the job. As a hunting round, the .338 Lapua delivers incredible energy at normal ranges, with more than enough to do the job at extended distances. At 800 yards the 300 grain hunting load still carries over 2000 ft/lbs of energy, more than enough for any North American game.

This long range hunting rifle is anchored in an Aramid composite-reinforced stock with a full-length aluminum bedding block. Threaded to the end of the premium 25” medium-weight barrel is a custom muzzle brake that both tames the recoil and directs the blast forward. Hunting from a distance where elevation adjustments are measured in minutes of angle or milliradian requires a good relationship between hunter and rifle, meaning time behind the trigger is a must. Our goal was to have a high-energy hunting rifle that wouldn’t punish the shooter, but still had what it takes to connect when the time comes. The confidence of knowing you own those ‘way out there’ shots, makes everything else just that much better.

CAL: .338 Lapua
STOCK/FINISH: Aramid composite/blue

CZ 550 SONORAN

The rifle that inspired the Western Series, the Sonoran is ideal for stalking mules through a desert valley or taking elk across a canyon. Built to be more of a long-range tack-driver than a mountain rifle, the Sonoran still comes in at under 8 lbs, thanks to its Manners 100% carbon fiber stock and fluted barrel.

Meant to take a licking, the Sonoran is ferritic nitrocarburized inside and out, meaning this rifle is near impervious to wear as well as corrosion. Not only does the surface treatment bring the hardness up to a Rockwell of 72, it also increases lubricity, meaning a little oil keeps the Sonoran running smooth as butter. Clad in its olive drab carbon fiber stock, it’s the rifle built to weather the toughest hunts on the planet.

Magnum chamberings wear a fluted, 26-inch barrel in a 4 contour, while non-magnums have a 24-inch 3. Besides its extreme corrosion and wear resistance, this surface treatment more than doubles the barrel’s expected life. When combined with the right ammo and a good scope/ mount combination, the Sonoran is guaranteed to shoot 1 MOA or better.

CAL: .30-06, .270 Win., 7mm Rem. Mag., .300 Win. Mag., .26 Nosler

ADJ–adjustable, F–/fixed, D–detachable, HF–hammer forged, SST–single set trigger

scope not included
CZ 550 SAFARI MAGNUM

The American model retains the quality and reliability of the original CZ 550 Safari Magnum, along with all of the features that make a CZ the perfect choice for dangerous game. The ASM has the same controlled-feed action, hammer forged barrel and single set trigger. The stock is made from select Turkish walnut and has a classic safari shape. The controlled round feed and fixed ejector make this rifle reliable enough for heavy and dangerous game.

FEATURES INCLUDE:
- 3-leaf express sights (1 standing, 2 folding)
- Hammer forged barrel
- Single set trigger
- Full-length aluminum bedding block for the ultimate in strength and stability.

SPECIFICATIONS:

- Caliber: .375 H&H Mag, .416 Rigby, .458 Win Mag
- Magazine capacity: 4 rounds
- Overall length: 53.5 inches
- Weight: 10.9 pounds

SAFARI CLASSICS AMMUNITION

CZ-USA offers its own headstamped ammunition to complement the Safari Classic rifles. The bullets are crafted from a single alloy for superior strength, rigidity and hardness for the ultimate in deep, bone-crushing penetration. Our soft and hollow point expanding ammunition incorporates only premium bullets for all-around performance on big game, delivering deep penetration and controlled expansion.

The .404 Jeffery was introduced in 1903 by Jeffrey of England to duplicate Nitro Express .450/400 3-inch performance in a cartridge designed for both action rifles. The .404 drives a 400 grain bullet at a muzzle velocity of 2,170 fps. The .450 Rigby is based on the classic .416 Rigby case. While it has only been around for just over 10 years, this cartridge has gained a reputation as the most effective dangerous game stopping cartridge for standard magnum sized actions. The 465 grain bullet travels at over 2,300 fps at the muzzle.

CZ 550 SAFARI MAGNUM

Known world-wide as the 602 Brno, the CZ 550 Safari Magnum is a true full-size magnum, not a smaller action blown out to barely hold the cartridge with only two rounds in the magazine. On the contrary, the Safari Magnum can hold four .416 Rigbys in the magazine!

Features include 3-leaf express sights (1 standing, 2 folding), hammer forged barrel and single set trigger. The stock is made from select Turkish walnut and has a classic safari shape. The controlled round feed and fixed ejector make this rifle reliable enough for heavy and dangerous game.

note: .375 H&H Mag, .416 Rigby, .458 Rigby
stock/finish: Field grade walnut/blue

MODEL VARIANTS:
- CZ 550 American Safari Magnum Walnut Field Grade
- CZ 550 American Safari Magnum Walnut Fancy Grade

LEFT HAND - The CZ 550 American Safari Magnum in .375 H&H Magnum is available in left hand configuration.

Note - Order the Warn Quick Detatch rings for proper fit on the LH model.

SAFARI CLASSICS

SAFARI CLASSICS MAGNUM EXPRESS RIFLE

The Safari Classic line from CZ-USA features the CZ single set trigger system set up to your specifications, milled or gloss blue finish on metal parts, 19mm dovetail, fixed magazine, express sights, barrel band and two stock reinforcing crossbolts.

POP-UP PEEP SIGHT

The coveted pop-up peep sight (at one time an option on the Brno 602, predecessor of the CZ 550 Safari Magnum) is now an option available from the Safari Classics Custom Shop. The pop-up peep fits in a receiver machined into the rear bridge of the receiver. When retracted, the peep sight does not interfere with the use of a scope, nor does it hinder the speed of the express sights. With the press of a button, the spring loaded sight snaps into position allowing for more precise aiming than provided by express sights. Of course it is always available as a backup should your scope fail as well.—$330.00 (Installed).

The .505 Gibbs and .500 Jeffery also include a mercury recoil reducer.

Limited edition signature series rifle starts out with a CZ 550 Magnum action chambered in .375 Holland & Holland. A few custom touches are included to make this rifle suit Craig’s personal preferences. The barrel has been shortened slightly to 24” and an upgraded Safari Classics front sight and barrel band forward sling swivel stud have been installed on it. The stock has been redesigned for this series with input from Craig and fellow Petersen’s Hunting TV host Kevin Steeles. The new stock is more trim and lively in the hand with a thinner wrist and a shallower, shallower, shorter fore-end. The 13.5” length of pull is terminated by a red, one-inch Decelerator® recoil pad fitted to the XX Claro Walnut stock. (The pictured field grade stock was the only sample available at the time this catalog went to print.) Limited edition upgrades on the metalwork include a jeweled bolt and Craig’s signature engraved on the floor plate as well as the “Craig Boddington” design engraved just forward of the action on the top of the barrel.

Limited edition upgrades on the metalwork include a jeweled bolt and Craig’s signature engraved on the floor plate as well as the “Craig Boddington” design engraved just forward of the action on the top of the barrel. Also included in the package are a few of Craig’s favorite safari accessories: a canvas sling and cartridge slide from Trader Keith and a leather bound hunting journal to record the memories of the hunt. This is a Limited Edition of 50 pieces including 45 right hand models and 5 left hand models.

Safari Classics Craig Boddington Signature Series .375 H&H

SAFARI CLASSICS EXPRESS RIFLE

The new Express Rifle is designed for cartridges that fit standard length actions. For the hunter wanting the same handling and features in a plains game rifle that they have in their dangerous game rifle, or for those of us who believe in the carry all day, shoot once philosophy of recoil management.

SAFARI CLASSICS CUSTOM GRADE RIFLES

• CZ 550 Magnum action with two-position positive safety
• Single set trigger set up to your specifications
• Glossy blue or matte blue finish on metal parts
• No. 1 Fancy grade walnut stock with straight comb and dual crossbolts
• Barrel band with sling attachment

Craig Boddington Signature Series
CZ TACTICAL/MILITARY

CZ 550 H.E.T. II
HIGH ENERGY TACTICAL

More than just a facelift, the High Energy Tactical has undergone a full redesign. Starting with a 550 Magnum action from the Czech Republic, our custom gunsmiths in the US sculpt a precision long range platform guaranteed sub-MOA. The new H.E.T. II rides in acacia fiber composite stock from Manners’ tactical series, with adjustable cheekpiece and molded-in midnight camo. Industry-standard Accuracy International magazines are secured to the chassis by custom Badger Ordnance bottom metal, and a low-mound Picatinny rail makes fitting optics a breeze. To melt away the .338 Lapua’s recoil, a Badger Ordnance FTE muzzle brake runs point. QD sling flush cups abound.

CZ 750 SNIPER
With an effective range of 800 yards, the CZ 750 Sniper is ideal for use by the elite military and law enforcement snipers it was designed for. The synthetic thumbhole sniper-style stock is adjustable for comb height as well as length of pull. The undersides of the forend is fitted with a 220mm long rail that provides multiple attachment points for a bipod. Two scope mounting options are available for the 750 Sniper. A Weaver rail comes installed, or by removing the rail, the integrated CZ 19mm dovetail may be used. The Sniper features a muzzle brake, thread protector, mirage shield and two sub-MOA. The new H.E.T. II rides in acacia fiber composite stock from Manners’ tactical series, with adjustable cheekpiece and molded-in midnight camo. Industry-standard Accuracy International magazines are secured to the chassis by custom Badger Ordnance bottom metal, and a low-mound Picatinny rail makes fitting optics a breeze. CZ 805 BREN A2
The B55 BREn is CZ’s answer to the need for a modular and reliable piston-operated selective-fire rifle. It is specifically built to switch between calibers and even magazine systems easily. Removing the barrel/piston system only involves 6 easily-accessible screws. Change the bolt face and the rifle can shoot a range of different cartridges (5.56x45 and 223x42 are currently on contact and many more are possible). Its magwell is interchangeable, so popping two pins allows it to convert to other styles of magazine. The 2015 version is set up for the STANAG magazines of the AR15/M16. Currently the BREN comes in A1 (14-inch barrel) and A2 (11-inch barrel), configurations with a monolithic 1913 top rail and accessory rails on sides and bottom. Its fixed folding stock can be quickly swapped for a folding, adjustable LOP stock or it can be removed altogether and replaced with a folding-knob encoder. The BREN is selective fire, with settings for safe, single shot, two-round burst or full auto.

CZ SCORPION EVO 3 A1
The CZ SCORPION EVO 3 A1 is a compact submachine gun in 9mm Luger. With a blowback-operated action, the Scorpion can empty its magazine in a hair over 1.5 seconds. Equipped with a folding, adjustable LOP stock, accuracy can be had out to 250 yards. The stock can be removed completely to create a surprisingly controllable machine pistol. To make the Scorpion user-customizable, the grip radius is adjustable for different hand sizes, the charging handle is reversible and the mag release is ambidextrous.

2015 ushers in a new era of CZ-USA shotguns. Though we’re continually improving our offerings, some notable changes have happened to our lineup this year. While we have a number of new products, some of our existing products have received updates worth noting.

The 812 is our first semi-auto that isn’t a gas gun. That means it doesn’t redirect the hot, expanding gasses from the shot to cycle the action. Instead, it operates using a short recoil system. With no gas and carbon to gum up the works, it’s a semi-auto shotgun that doesn’t get fouled up with heavy use, with all of the grime going right out the end of the barrel. Clad in camo for waterfowl hunting, it’ll be the perfect gun for the brutal conditions that come with waterfowling.

Also dipped in camo, a pair of 612 pumps joins the line. Both chambered for magnum 3½ inch rounds, one wears Realtree Xtra® Green and a 26-inch barrel for chasing turkeys, while the other is in Realtree MAX-4® with a 28-inch barrel for blending into the marsh or stubble field.

Our popular Ringneck side-by-side has been replaced with the Sharp-Tail, sporting all of the same features but with a lighter-weight receiver. More importantly, the internals have been upgraded. Gone are the v-style hammer leaf springs, replaced with coil springs like our over/unders, as are the sear springs. The result is lighter, smoother trigger pulls – and in a much smaller package.

Many of our over/unders have been upgraded to a CNC-milled, one-piece receiver. This second generation brings even better reliability, as well as sharp laser-cut checkering, pistol grips and attractive white beads, and is noted by the ‘G2’ designation.

On our semi-auto line, the 712 G2 gets a facelift as well as a new barrel retention nut, which means the wooden forend is no longer sandwiched in between the barrel lug and the forend cap.

Last but not least and built for those with a competitive streak, the 612 Trap is a pump-action that dominates clay games. Packed with features, it has a high rib and matching Monte Carlo, ported 32-inch barrel and extended chokes. CZ-USA team shooter Tom Mack has already used one to win the 2014 NSCA National Championship in the pump division. What will you win with yours?
CZ 612 FIELD
Simple, strong and smooth, the 612 field is designed to shoot everything from targets to turkeys. Wearing a walnut stock and satin chrome finish on its 28-inch barrel, this rugged pump will hunt for generations to come. Chambered for 2½ and 3 inch shells and supplied with three chokes, it’s the hardest working shotgun in our line.

CZ 620 YOUTH
The 620 Youth is designed for both kids and adults – the size, shape, and gauge appeal to the kids and the price tag appeals to their parents. Perfect for the new hunter in the family, this lightweight 20 gauge is a simple, safe and reliable gun for youngsters. Like all of our pumps, it has a crossbolt safety behind the trigger. Featuring a reduced length butt stock and a 24-inch barrel for easy handling, it shoots 2½ and 3 inch shells and comes complete with a set of three choke tubes.

CZ 612 MAGNUM TURKEY
The 612 Magnum Turkey was created for the turkey woods. This pump gun comes equipped with two chokes, one extra-full to deliver maximum pellets to the kill zone and one modified for upland hunting and steel shot. Make sure you don’t take your eyes off of it as you just might lose it in the spring foliage.

Available in 12 gauge with a 3½ inch chamber and a 26-inch barrel, the Magnum Turkey is hydrodipped in Realtree Xtra® Green.

CZ 612 MAGNUM WATERFOWL
Built for the goose blind, the 612 Magnum Waterfowl boasts the perfect waterfowl camo pattern combined with a 3 ½ inch chamber for magnum shotshells. This machine is the best tool for making big birds fall from the sky. The 612 Magnum Waterfowl ships with 5 extended black choke tubes.

Available in 12 gauge with a 3½ inch chamber and a 28-inch barrel, the Magnum Waterfowl is hydrodipped in Realtree MAX-4® camo.

CZ 612 HOME DEFENSE COMBO
The 612 Home Defense is a no-nonsense 12 gauge fitted with an 18½-inch cylinder-bore barrel and a black synthetic stock. The Combo adds a 26 inch vent rib field barrel to mix, enabling a quick swap from defensive to hunting/target mode. Built on our smooth 612 action, this versatile model shoots 2½ and 3 inch shells with either barrel.

MODEL VARIANT:
• CZ 612 Home Defense - 18 1/2 inch barrel only

CZ 612 HC-P
With the 612 HC-P (aka Horde Control - Pump), you won’t be under-gunned when zombie hordes fill the streets post-outbreak. This fun pump shotgun features a full-length pistol grip stock and ghost ring sights with glow fiber dots for fast zombie target acquisition. The 20-inch barrel and full-length pump forend make it an excellent home defense gun as well.

CZ 620 BIG GAME
Whether you prefer the fast handling, hard hitting characteristics of a slug shooting pump gun for deer, or the state game department made that choice for you, it’s hard to beat the CZ 620 Big Game. A cantilever rail comes mounted to its 22-inch smoothbore barrel, making it ideal for a low-power scope or red-dot. The extended rifled choke enhances the performance of rifled slugs, giving it deadly accuracy.

Need choke tubes? Head to: shop.cz-usa.com
CZ 712 SEMI-AUTO 12 GAUGE
A great choice for the bird hunter or recreational clay shooter that likes the benefits a semi-auto shotgun brings. Plugged to 2+1 from the factory for migratory bird hunting, the plug is quickly and easily removed to open it up to 4+1. The 712 is built on an alloy receiver with a 28-inch barrel and Turkish walnut stocks. Finished in a high gloss black chrome, it has some more modern lines running through the action and stock. The action’s mechanism differs from our 712, with its return spring located in the buttstock rather than over the magazine tube, making the magazine tube and gas system much easier to clean. This machine is designed to shoot standard field loads all the way up to 3-inch magnum hunting loads.

MODEL VARIANT:
- CZ 720 Semi-Auto - 20 gauge, 26-inch barrel

CZ 812 WATERFOWL 12 GAUGE
Stop passing gas in the duck blind! Introducing CZ-USA’s first semi-automatic to deviate from a gas-operated cycling system, the 812 relies simply on recoil to operate the action. The result is a gun that doesn’t get as dirty, since all the powder residue goes right out the end of the barrel. Clad in waterfowl camouflage, the 812 is right at home in a layout blind or boat and is plugged from the factory to make it legal for migratory birds (easily removed if pursuing other game). An oversized trigger guard makes gloved use easy, and it ships with 5 extended black choke tubes.

Available in 12 gauge with a 3-inch chamber and 28-inch barrel, all in a plastic hardcase.

CZ 712 SEMI-AUTO G2 12 GAUGE
CZ 712 is our tried-and-true gas operated semi-automatic built on a lightweight alloy receiver. Accepting 2¾ and 3-inch shells, it is an all-rounder, a great choice for upland game, waterfowl or clays. The barrel on the 712 is chrome-lined and has a matte black hard chrome exterior that will resist corrosion for many seasons in the field. Fit with a Turkish walnut stock, the G2 version adds new laser-engraved checkering, right-hand plam swell as well as a barrel lock-ring to make assembly easier.

MODEL VARIANT:
- CZ 720 Semi-Auto G2 - 20 gauge, 26-inch or 28-inch barrel

CZ 712 AL5 G2 12 GAUGE
The 712 AL5 is outfitted with the fully-adjustable ATI Akita stock. This nifty accessory allows users to change the length of pull with the push of a button. It also has three comb height positions with an easy screw adjustment. This makes the AL5 perfect for women and kids, as well as making it ideal for waterfowl and turkey hunting. Both the 26-inch and 28-inch barrel configurations accept 2¾ and 3-inch shells.

MODEL VARIANT:
- CZ 720 AL5 - 20 gauge, 24-inch barrel

CZ 912 SEMI-AUTO 12 GAUGE
A great choice for the bird hunter or recreational clay shooter that likes the benefits a semi-auto shotgun brings. Plugged to 2+1 from the factory for migratory bird hunting, the plug is quickly and easily removed to open it up to 4+1. The 912 is built on an alloy receiver with a 28-inch barrel and Turkish walnut stocks. Finished in a high gloss black chrome, it has some more modern lines running through the action and stock. The action’s mechanism differs from our 712, with its return spring located in the buttstock rather than over the magazine tube, making the magazine tube and gas system much easier to clean. This machine is designed to shoot standard field loads all the way up to 3-inch magnum hunting loads.

MODEL VARIANT:
- CZ 920 Semi-Auto - 20 gauge, 26-inch barrel

CZ 712 PRACTICAL G2 12 GAUGE
The Practical is the first shotgun from CZ-USA designed specifically for 3-Gun competition. The 6-position adjustable butt stock adjusts from 11.25 to 15 inches and is installed on a commercial spec tube that allows for further customization. The 4+1 flush magazine extension gives 9+1 rounds of firepower and extends just past the 22-inch 12 gauge barrel to help protect the muzzle. The Practical ships with 5 flush choke tubes and very affordable price tag.

CZ 712 SYNTHETIC G2 12 GAUGE
The CZ 712 Synthetic is the great tool for the person who needs a rugged, weather-proof shotgun. This hunting scattiergun is built for the harshest conditions, with black matte hard chrome covering all metal surfaces and a synthetic butt stock and forend. Available in 12 gauge with a 3-inch chamber, 28-inch barrel, 5 flush-mount choke tubes, all in a plastic case.

CZ 712 UTILITY G2 12 GAUGE
The 712 Utility is exactly that – it’s an all-purpose tool gold for anything from home protection to pest control on the farm. Its small size makes it a very handy shotgun that is easy to stash, whether behind the truck seat or behind the closet door, allowing it to be there when you have to have it.

CZ 712 SYNTHETIC G2 12 GAUGE
The CZ 712 Synthetic is the great tool for the person who needs a rugged, weather-proof shotgun. This hunting scattiergun is built for the harshest conditions, with black matte hard chrome covering all metal surfaces and a synthetic butt stock and forend. Available in 12 gauge with a 3-inch chamber, 28-inch barrel, 5 flush-mount choke tubes, all in a plastic case.

- Rubber recoil pad with snag-free heel
- Cast-off for the right handed shooter (except ALS and Practical)
- 5 year limited warranty
CZ SPORTER STANDARD GRADE G2
(WITH ADJUSTABLE RIB)
This target model is great for the shooter wanting to adjust the point of impact to shoot flat for sporting clays and high for American trap—all in one gun. Based on the Standard Grade Sporter G2, it is equipped with Moneymaker Guncraft’s famous adjustable rib and a factory 4-way adjustable parallel comb. This special application shotgun is truly unique and is designed for the more serious target shooter who understands the point of impact they desire. Available in 12 gauge with your choice of 30- or 32-inch barrels, it comes with a set of 6 Kicks stainless steel chokes designed by Tom Mack.

A set of 6 Kicks stainless steel extended choke tubes come standard on most of CZ-USA’s target shotguns. Designed by 15-time All-American sporting clays shooter Tom Mack, the rings in the knurling indicate the range at which they should be used. The constrictions are:

- 1 ring - Short Range - .005” constriction (skeet)
- 2 rings - Medium Range - .015” constriction (light modified)
- 3 rings - Long Range - .025” constriction (improved modified)

These are also available in our webstore at: shop.cz-usa.com

CZ SUPER SCROLL COMBO SET
(20 GAUGE & 28 GAUGE BARRELS/FORENDS)
The Super Scroll Combo Set is a unique package intended for the hunter or sporting clays shooter who wants to carry an absolutely gorgeous shotgun. This 20- and 28-gauge combo includes 30-inch barrels and forends for each gauge. Ornate hand-engraved scrollwork adorns the receiver, faux sideplates, trigger guard and monoblock. Built on a 20 gauge frame and action, both barrel sets are equipped with ejectors. This highly-engraved work of art comes standard with five chokes per gauge and a full grip, making it an excellent crossover gun between clay and feather.

Ships in a custom-fit aluminum case from Americase®.
Professional sporting clays shooter Tom Mack made off with one of our very first 612 Trap shotguns in mid-2014 and proceeded to win the NSCA National Championship. Breaking 97/100 clays in the pump event, Tom walked away with the national title for the category – with a gun that retails for under $500.

**CZ SPORTER G2**
The Sporter in Grade 3 wood is one of CZ's most beautiful guns. It builds upon the Standard Grade with an intricate hand-engraved receiver with deep relief scrollwork and upgraded wood furniture. It has the same deep black chrome finish, tuned triggers and Monte Carlo sporting stock, making it both beautiful and absolutely deadly on clays. Available with 30- or 32-inch barrels, it also ships with a set of 6 Kicks stainless steel extended choke tubes. Added for 2015 is the full forend, laser-cut checkering and 1-piece CNCed receiver.

**CZ SPORTER STANDARD GRADE G2**
The Sporter Standard Grade is designed specifically with the sporting clays enthusiast in mind. It features the same single selectable trigger system found in the Redhead, tuned to break crisply at 4 to 5 lbs. Fitted with a Grade 2 Monte Carlo sporting stock with adjustable comb and a right-hand palm swell, it offers the sporting clays competitor everything they need in a competition gun. It is available with 30- or 32-inch barrel configurations and ships with a set of 6 Kicks stainless steel extended choke tubes. Added for 2015 is the full forend, laser-cut checkering and 1-piece CNCed receiver.

**CZ REDHEAD PREMIER TARGET**
The Redhead Premier Target is assembled like the standard Redhead Premier but with a different purpose in mind. This over/under has been designed to crush clay targets, plain and simple. It comes fitted with a special Monte Carlo stock that keeps the gun on your shoulder while keeping your head up to see the clays. Add to that a healthy right-hand palm swell, 30-inch barrels and a stepped rib designed for rising trap targets – it’s the perfect choice for those wanting to own a true target gun at an affordable price. Shipped with a set of 6 Kicks stainless steel choke tubes, the 2015 version gains laser-cut checkering and a 1-piece CNCed receiver.

**CZ SHARP-TAIL TARGET**
This new target side-by-side carries all of the mechanics of the Sharp-Tail but with a 30-inch barrel and a 14 ¼ inch length of pull. Originally designed to tackle side-by-side sporting clays events, it is a classic double gun that doesn’t carry the accustomed weighty price tag. Equipped with a set of 6 Kicks stainless steel choke tubes, it’s the perfect choice for a clay shooter or gentleman hunter.

**CZ 712 TRAP**
There was a time when pump-action shotguns ruled the American Trap field. The combination of simplicity, reliability and price made it ideal for the sport. This very special pump-action shotgun features a 32-inch ported barrel with 5 extended choke tubes, a high-ventilated target rib, a parallel comb on a walnut Monte Carlo stock, gold trigger, dual action bar and smooth operating system with a spring-loaded ejector. Carrying every feature the hardcore clay shooter looks for in a competition shotgun, it’s not just for the trap market; it’s also great for sporting clays pump events – just ask CZ-USA team shooter Tom Mack, who won the 2014 NSCA National Championship’s pump division with one!

**CZ 712 TARGET G2**
The 712 Target is built for the trap field and is a perfect choice for the price-conscious shooter. It also makes a great starter gun for new shooters. This 30-inch 712 is equipped with a larger target style stock that provides a comfortable fit. When combined with the soft-operating gas system, it makes recoil almost nonexistent.
CZ-USA is proud to offer these beautifully hand-crafted shotguns— they are a wonderful combination of old world craftsmanship and modern technology. All CZ double guns are built on gauge-specific frames proportionate to their bore size. The barrels are chrome-lined and have a durable black chrome exterior finish. These affordable guns are nicely fitted with select Turkish walnut, delighting the most discriminating aficionados.

**CZ REDHEAD PREMIER**

The flagship of our over/under line, the tried-and-true Redhead also gets our new 1-piece CNCed receiver. In addition, it gets the same laser-cut checkering, solid mid-ribs, pistol grip and a classy white bead. The Redhead Premier is a true all-purpose shotgun; it’s just as comfortable to shoot at a sporting clays event as it is when chasing chukar in the mountains. With a silver receiver and ejectors that kick out the spent shells automatically, the Redhead Premier is packed with features that can’t be found on another shotgun in its price range.

Available in 12 & 20 gauges with 3-inch chambers, selectable 28-inch barrels, Turkish Walnut stocks, independent auto-ejectors and 5 flush-mount choke tubes, all inside a hard plastic case.

**MODEL VARIANT:**
- CZ Redhead Premier Reduced Length- 20 gauge with 24-inch barrels and 13 inch length of pull.

**CZ WINGSHOOTER ELITE**

Replacing our weapon Kingpin is the Wingshooter Elite. Built on our new CNCed 1-piece receiver, the Elite’s side plates are fully hand-engraved, reminiscent of our custom-grade Super Sport. It carries all of the best features in our over/under box, with single selectable triggers, solid mid-ribs, ejectors and two-tone chassis finish. Add to that laser-cut checkering, solid mid-ribs, pistol grip stock and a white bead and it’s hard to find a classier-looking shotgun for the money.

Available in 12 & 20 gauges with 3-inch chambers, selectable 28-inch barrels, Turkish Walnut stocks, independent auto-ejectors and 5 flush-mount choke tubes, all inside a hard plastic case.

**OVER/UNDER FEATURES:**
- Chrome-lined bores
- Coil operated hammers
- Ejector & extractor models
- 2½ & 3-inch chambers
- 6mm, 8mm & 10mm* ribs available
- Turkish walnut stock
- 18 lines per inch hard checkering
- Smooth round heel
- 14½ & 14¼” length of pull depending on model
- 5 interchangeable flush mount chokes
- 5 year limited warranty
- Detailed hand engraving

*Competition models only

**CZ SOUTHPAW STERLING**

To this point, all of our shotguns have been cast off for right-handed shooters. The Southpaw Sterling is lefty-friendly—about time, right? Cast on for left-handed shooters, it shares most of the other features of the Upland Sterling, but with a more universal 29-inch barrel. Whether it’s breaking clays or downing birds, the Southpaw is ready for the task, operating with the clockwork precision that the Upland Sterling is known for. This gun comes with 5 flush-mount choke tubes, a mechanical trigger and safety with selectable barrels.

Available in 12 gauge with a 3-inch chamber, 29-inch barrels, ejectors, CAST ON stock 1/4 at the heel and 7/16 the at toe, with a regular right-handed top lever latch, all inside a plastic case.

**CZ UPLAND STERLING**

The Upland Sterling is built on a new platform featuring a CNC-milled steel receiver—resulting in mechanical components that operate with clockwork precision and consistency. This classy over/under is unique in its modern look and finish combined with classic design. The Turkish walnut stock features a stippled grip area on the wrist and forend rather than the traditional over/under is unique in its modern look and finish combined with classic design. The Turkish walnut stock features a stippled grip area on the wrist and forend rather than the traditional checkering. It is available in 12 gauge with a 29-inch barrel.

**CZ CANVASBACK GOLD**

The Canvasback Gold is a re-imagining of our workhorse Canvasback. The black chrome receiver is lightly engraved with two gold birds inlaid on each side, and the barrels have solid mid-ribs, pistol grip stock and a white bead. It's a classic looking shotgun for the money.

Available in 12 & 20 gauges with 3-inch chambers, selectable 28-inch barrels, Turkish Walnut stocks, independent auto-ejectors and 5 flush-mount choke tubes, all inside a hard plastic case.

**CZ LADY STERLING**

Finally a shotgun fit for a lady! As the product photo demonstrates, the dimensions required to properly fit female shooters look very different from the stock designs found on most shotguns. The Lady Sterling’s special stock dimensions allow most women the ability to mount the gun firmly on their shoulder while keeping their head up and eyes on target. It also has enough pitch to make it much more comfortable (around 8°). This classy shotgun is built on the Upland Sterling receiver and carries a single extractor rather than individual ejectors. Chambered in 12 gauge with 28” barrels, it handles both 2¾ and 3 inch shells.

**CZ MALLARD**

The Mallard is designed to be the simplest, most cost effective over/under CZ produces. This gun is built on the same box lock frame design but it features a dual-trigger system, which is much simpler and less costly to produce. It has been a favorite for those who like the functionality of an over/under with a cost well below most semi-auto shotguns. This gun is available in 12 and 20 gauge and has 28-inch barrels.

**CZ UPLAND ULTRALIGHT**

Our lightest 12 gauge ever, the Upland Ultralight combines an aluminum receiver with some unique features to keep the weight down. With a thin 8mm top rib, mid-rib delete and hollowed-out butt stock, the Ultralight averages 6 lbs. The first of our over/under receivers to be fully CNCed, it has a reputation for reliability and consistency because of its light weight, it’s ideal for long days canvassing Kansas rooster fields. The metal surfaces are finished in a matte chrome, giving it a rugged, weather-resistant finish that is non-reflective. One of the most attractive figures is the Ultralight’s price, meaning it’s also light on the pocketbook.

**CZ Sharp-Tail**

An evolution of our wildly popular Ringneck, the Sharp-Tail is an entirely new action. Much smaller overall, it now features coil springs instead of leaf springs and sports the same color case-hardened finish. With a single selectable mechanism trigger and pistol grip, the Sharp-Tail is one of the sharpest-looking and sports the same color case-hardened finish. With a single selectable action. Much smaller overall, it now features coil springs instead of leaf springs.

CZ Bobwhite

The Bobwhite side-by-side shotgun appeals to the traditional shooter with its dual trigger system and straight grip stock. The straight grip allows for easy handling and is a favorite with bird hunters today. Available with 28-inch barrels in 12, 20, 28, and .410 gauge.

**CZ Hammer Coach**

CZ hammer guns are built with Old West flair but with modern materials to handle smokeless powder. Both the Hammer Classic and the Hammer Coach have fully-functional hammers and are built on a true side lock frame design. The 12 gauge Hammer Coach has 20-inch barrels with cylinder bore, making it perfect for Cowboy Action or home defense, while the Hammer Classic has 30-inch barrels with interchangeable chokes. So whether you plan on riding shotgun on a stagecoach or just want to relive hunts of old with a shotgun similar to your great-grandfather’s flower piece, we’ve got it covered.

**Model Variant:**
- CZ Hammer Classic - 30-inch barrels, interchangeable chokes
