DAN WESSON FIREARMS

ZBROJOVKA BRNO

This year kicks off an enormous milestone that we've been working towards for many years — production of CZ firearms here in the United States. Our dedicated team has put blood, sweat and tears into the first U.S.-made CZ P-10s, to include the P-10 S, C and F as well as optic-ready versions of each.

We owe a great deal of gratitude to our parent company in the Czech Republic, who has been an invaluable resource as we embark on our great manufacturing project. With our ever-increasing production capabilities stateside, expect bigger and better projects to come out of both our U.S. headquarters as well as Dan Wesson, which will be debuting a very special handgun line sometime in 2019.

Also expanding rapidly has been the use of CZ firearms with U.S. Law Enforcement and government agencies. Though you may not know it, our firearms can be found in the saddlebags of motorcycle patrol officers, hidden in undercover backpacks at major sporting events and on the duty belts of officers across the nation. Approved for use in more and more departments each month, the striker-fired P-10 has helped expose our name to more people than ever before.

It's amazing to see how far we've come in the last two decades, and none of it would have been possible without the hard work and dedication of our employees, the loyalty and devotion of our customers and most of all, the quality firearms that our factories are known for. May we be so fortunate in the next two decades to make our employees proud to work here, keep our customers always satisfied and to continue to make the CZ name known for both high value and high quality.

Alice Poluchova  
CZ-USA President

Keep an eye on our website ([cz-usa.com](http://cz-usa.com)) and webstore ([shop.cz-usa.com](http://shop.cz-usa.com)) for updates to our products and accessories throughout the year.

Watch for CZ-USA firearms to be featured on *Petersen's Hunting Adventures*® on the Sportsman Channel, *CZ-USA's GunDog TV* on the Outdoor Channel, *Wingshooting USA* on NBC Sports, Pursuit Channel, MAV TV, AMG TV, Tuff TV and The Walk as well as *Project Upland*, an epic birdhunting series published online.

We're always posting new products and event info on Facebook, Instagram, YouTube, Twitter and our website. Visit us online and share your own photos, videos and experiences with other CZ enthusiasts by tagging us.

# BREN 2 Ms

## CZ BREN 2 Ms PISTOL

The next generation of the Bren, the Bren 2 Ms makes first landfall in the U.S. in pistol form with multiple barrel lengths and two chamberings.

Whereas the 805 Bren was designed to a specific set of requirements set out by the Czech military, the Bren 2 is a clean-sheet design. With a bevy of changes, the most noticeable is sure to be the strict weight-loss regimen that the Bren 2 has undergone. With a trimmed-down aluminum receiver and a lower made from carbon fiber-reinforced polymer, the result is a robust but substantially lighter gun.

Gone is the reciprocating charging handle, replaced with one that stays stowed in the forward position until it is needed. Swappable from side to side, it does double duty as a forward assist. Also added is an AR-style bolt catch/release system that is mirrored on both sides of the firearm, as well as a catch/release nestled into the front of the triggerguard. The magazine release and safety are also ambidextrous and located in very familiar locations for anyone versed in the AR platform.

Chambered in 223 and 7.62x39, each is available in several barrel lengths. AR-15 style magazines are used for 223 variants, whereas in 7.62 the factory's magazines are used to ensure last-round hold-open and consistent feeding. All variants are swappable to different barrel lengths and chamberings and also feature a modular forend that can be swapped to different lengths.

In pistol form, the Bren 2 Ms comes with a flush rear plate that has the provision for attaching a AR-style buffer tube for the installation of an arm brace, cheek rest or similar pistol stabilizing device. For those who wish to SBR it, a carbine buffer tube and stock can be installed or the entire rear plate can be removed and replaced with a factory folding/adjustable stock.

CAL: 223/5.56x45 or 7.62x39 FINISH: Black

The Bren 2 was developed as a select-fire rifle for the Czech military. The Bren 2 Ms has a modular forend (hence the “M”) and is in semi-auto-only (“s”).

## CZ 750 SNIPER

With an effective range of 800 yards, the CZ 750 Sniper is ideal for use by the elite military and law enforcement snipers it was designed for. The synthetic thumbhole stock is adjustable for comb height as well as length of pull. The underside of the forend is fitted with a 220mm-long rail that provides multiple attachment points for a bipod.

Two scope-mounting options are available for the 750 Sniper. A Weaver rail comes installed, or by removing the rail, the integrated CZ 19mm dovetail may be used. The 750 features a 18x1 muzzle brake, thread protector, mirage shield, two 10-round detachable magazines and its 26" barrel has 4-groove rifling in 1:10" twist.

CAL: 308 Win. (7.62x51 NATO) STOCK/FINISH: Black composite tactical/blue

optics not included

## CZ 557 URBAN COUNTER-SNIPER

Built to be compact, the 557 Urban Counter-Sniper is designed to excel at engaging targets within 400 yards. Chambered in 308 Win., the short 16" barrel only sacrifices 150 fps compared to a standard barrel, and its 5/8x24 three-prong flash hider serves as a QD for a suppressor. The carbon-fiber-composite Manners stock provides a rock-solid platform without weighing the rifle down. The large, detachable box magazine and oversized bolt handle make feeding the rifle easy as can be. QD flush cups on the left side make it easy to sling the rifle across the back.

CAL: 308 Win. STOCK/FINISH: Carbon-fiber composite/black

# SCORPION

## CZ SCORPION EVO 3 S1 PISTOL

With dead-simple blowback operation, the Scorpion will chew through an ammo stockpile in no time flat. Based on our tried-and-true A1 submachine gun, the Scorpion Pistol and all of its variants revolve around the same principle — less is more. With fewer moving parts in general and over-built, robust components, the Scorpion derives reliability from its simplicity.

An 11-inch Picatinny rail rides on top, and a superb set of aluminum adjustable sights are fitted from the factory. With four rear aperture sizes, they can be set up for quick acquisition or precision with just a spin of the rear sight. The muzzle on the Scorpion Pistol is threaded with both 18x1 and 1/2x28, so fitting a suppressor or muzzle device is a no-brainer.

**CAL:** 9mm Luger **FINISH:** Black

### MODEL VARIANTS:

- CZ **Scorpion EVO 3 S1 Pistol Battleship Grey** — Battleship Grey furniture
- CZ **Scorpion EVO 3 S1 Pistol FDE** — Flat Dark Earth furniture
- CZ **Scorpion EVO 3 S1 Pistol OD Green** — OD Green furniture

## CZ SCORPION EVO 3 S1 PISTOL W/ FLASH CAN & FOLDING BRACE

Equipped with a folding SB Tactical arm brace, this Scorpion Pistol wears the forend of its larger brother, the Carbine. With the same 7.7" pistol barrel, owners can unscrew the 5" KAK Flash Can and install most pistol suppressors under the handguard, keeping the overall length down. Dual threads of 18x1 and 1/2x28 make fitting a suppressor simple.

**CAL:** 9mm Luger **FINISH:** Black

### MODEL VARIANT:

- CZ **Scorpion EVO 3 S1 Pistol w/ Flash Can** — Rear sling attachment plate instead of folding brace

## CZ SCORPION EVO 3 S2 MICRO PISTOL W/ BRACE

With a 4" barrel and HB Industries short handguard, this diminutive Scorpion is the result of our development of a smaller, suppressed Scorpion for an undercover drug interdiction unit. With a collapsed length just over 16 inches, this pint-sized pistol features a faux suppressor nestled under the handguard. Its telescoping SB Tactical arm brace extends for additional stabilization, making this one potent little package.

**CAL:** 9mm Luger **FINISH:** Black

**Our Scorpion pistols are ideal candidates for conversion to Short Barreled Rifles. Regulated under the National Firearms Act of 1934, SBRs require a background check by the ATF and a \$200 tax stamp before conversion.**

CZ SCORPION BULLPUP KIT

Relying on the bullpup expertise of the aftermarket design gurus over at Manticore Arms, the Scorpion Bullpup Kit has been a project long in the making. Able to convert any Scorpion over to a bullpup configuration, it reuses trigger components of the gun being converted and condenses the Scorpion down to an even smaller package.

The ideal candidate for conversion is the Scorpion Carbine, and the bullpup chassis ties into our standard Carbine handguard as well as Manticore's and HB Industries' long handguards. With the addition of one of those handguards, Scorpion pistols can be converted as well, though doing so with a barrel length less than 16" will require proper paperwork/tax stamp and conversion of the pistol to an SBR.

For those who will want to modify their Scorpion Bullpup, it retains the ability to take aftermarket grips, trigger shoes, charging handles and magazine releases.

In addition to reducing the overall assembled length of the Scorpion Carbine, the Bullpup conversion also shifts the weight of the rifle to the rear.

Bullpup Kits can be purchased through our webstore at shop.cz-usa.com.

CZ SCORPION EVO 3 S1 CARBINE W/ FAUX SUPPRESSOR

The Scorpion Carbine is a whole new animal. Building on the lauded submachine gun platform that first hit the U.S. civilian market in pistol form in 2015, the Carbine has a 16.5" barrel fitted with either a compensating muzzle brake or a faux suppressor built specifically for CZ-USA by SilencerCo.

Fit with the factory's folding adjustable stock, the Carbine features a number of U.S.-made parts to make it fully 922(r) compliant. One of the nicest features of the firearm is the carbine-length forend, which is covered in M-LOK attachment points to keep the profile slim while still being big enough to swallow most pistol-caliber suppressors should the owner decide down the road to convert it to an SBR for use with a suppressor.

Low-profile aluminum adjustable sights round out the platform, and a top Picatinny rail allows the mounting of a wide array of optics.

CAL: 9mm Luger STOCK/FINISH: Folding/adjustable, Black

MODEL VARIANT:

- CZ Scorpion EVO 3 S1 Carbine w/ Muzzle Brake — Compensating muzzle brake instead of faux suppressor

CZ SCORPION EVO 3 S1 CARBINE FDE W/ MUZZLE BRAKE

If you've got too many black guns already, the Scorpion Carbine also comes in several versions clad in Flat Dark Earth furniture.

CAL: 9mm Luger STOCK/FINISH: Folding/adjustable, FDE

MODEL VARIANT:

- CZ Scorpion EVO 3 S1 Carbine FDE w/ Faux Suppressor — Instead of the muzzle brake this variant uses a faux suppressor for a muzzle device

## MILITARY/LAW ENFORCEMENT ONLY

## CZ TACTICAL PRODUCTS BY 4M

Developed by 4M in the Czech Republic, this line of products uses advanced materials and innovative designs to better suit those who serve. Find an assortment of 4M products available through CZ-USA at:

[SHOP.CZ-USA.COM/TAC-PRODUCTS-BY-4M](http://SHOP.CZ-USA.COM/TAC-PRODUCTS-BY-4M)

## CZ BREN 2

The ever-evolving needs of military forces led to the further development of the Bren platform. Whereas the 805 was built to a specific set of predetermined requirements, the Bren 2 took years of input and data from use in the worldwide war on terror and put it all together in a smaller, lighter package.

A shorter gas system allows for barrel lengths down to 8", while giving settings for normal use or adverse conditions. The aluminum receiver is shorter and thinner, shaving weight from the rifle. Modular and built to swap between chamberings and barrels, the Bren 2 is available in three barrel lengths in 223/5.56x45 and one in 7.62x39.

Gone is the reciprocating charging handle and in its place is one that remains forward while the action cycles, but can be used to charge the rifle via a ratcheting mechanism that allows it to be used as a forward assist if needed. All controls are ambidextrous, including a bolt release located inside the trigger guard. For those familiar with the M16/AR-15 platform, a paddle-style bolt catch/release is located on the left side of the weapon.

The Bren 2 is select-fire, currently only available for military/LE special-order.

**CAL:** 223/5.56x45, 7.62x39 **STOCK/FINISH:** Folding/adjustable, black

## CZ BREN 2 BR

Chambered in 308 Win., the BR in this Bren's name stands for Battle Rifle. Piston-driven and loaded with all the same ambidextrous features seen on its smaller Bren 2 counterpart, this larger rifle adds a modular forend, much like the semi-auto Bren 2 Ms found earlier in this section. The Bren 2 BR is select-fire, meaning it is only available on military/LE special-order basis.

**CAL:** 308 Win. **STOCK/FINISH:** Folding/adjustable, black

## CZ SCORPION EVO 3 A1

The CZ Scorpion EVO 3 A1 is a compact submachine gun in 9mm Luger. With a blowback-operated action, the Scorpion can empty its magazine in a hair over 1.5 seconds. Equipped with a folding, adjustable LOP stock, accuracy can be had out to 250 yards. The stock can be removed completely to create a surprisingly controllable machine pistol.

To make the Scorpion user-customizable, the reach to trigger is adjustable for different hand sizes, the charging handle is reversible, and the mag release is ambidextrous.

The EVO's frame and trigger guard assembly are made of a lightweight polymer with monolithic top rail and accessory rails on sides and bottom. Fieldstripping is made simple with a captured pin that allows the removal of the trigger assembly, enabling easy removal of the bolt and all moving parts.

Select-fire versions of the Scorpion are only available on military/LE special-order basis.

**CAL:** 9mm Luger **STOCK/FINISH:** Folding/adjustable, black

## FIRST RESPONDER PURCHASE PROGRAM

CZ-USA recognizes the many sacrifices our first responders and military members make on a daily basis. As a small way of saying thanks, we offer a special buying program for these special people (as well as retirees from these professions), and participants enjoy a significant savings off MSRP. To request program details, email [LESales@cz-usa.com](mailto:LESales@cz-usa.com).

# *Suppressors*

# SUPPRESSORS

With evolving needs on our Law Enforcement (LE) side necessitating a Scorpion-specific suppressor, we decided it was high time to throw our hat in the ring in the U.S. suppressor market. We're of the opinion that any product we can sell to LE we should also be able to sell to any other civilian, so while the Hughes Amendment might preclude the real fun stuff, we're happy to offer a line of suppressors that are optimized for CZ platforms.

From the Scorpion S2 reflex to our line of titanium centerfire reflex cans, the overarching theme in our suppressor line is that function should dictate form. The results are lightweight and robust, with no excess bulk. Where possible, we incorporate reflex systems that minimize the overall length when threaded onto a host while maximizing internal volume — allowing these cans to suppress better than competitor offerings with the same overall firearm length.

## CZ RIMFIRE

Simple, lightweight and highly effective! With a patented screw-in baffle system, our Rimfire suppressor maximizes its use of internal capacity. Unlike monocoreshells or baffle stacks, there's no extra material contained within, eating up valuable capacity that could be aiding suppression. Not only does this help the Rimfire return impressively low decibel (dB) readings, it also translates into light weight. Tipping the scales at a ridiculously low 2.5 oz., we feel confident in saying that when it comes to suppression per ounce, the CZ Rimfire is at the top of the rimfire suppressor foodchain.

Built to blend into the heavy cylindrical barrels found on most of our rimfire Varmint rifles, the Rimfire has an external diameter of 0.866" and a length of 6.9".

Another feature of our rimfire suppressor system is the ability to tune the baffle system itself. A guide is provided on the assembly/disassembly tool to space the four internal baffles at regular distances. If a user wishes, they can also vary those baffle depths in an effort to find the right mix for the particular load they're shooting. For example, if they want a large blast chamber with shorter spacing on subsequent baffles, the ability is at their fingertips.

Able to be easily taken apart for cleaning, the Rimfire can be used on any rimfire round under .224 in diameter, including 17 HMR, 22 WMR and even 17 WSM. Additionally, it is safe to use with 17 Hornet, 22 Hornet and 5.7x28. Due to the dirty nature of rimfire ammunition, cleaning every 300 rounds is recommended.

**CAL:** Any rimfire below .224", 17 Hornet, 22 Hornet and 5.7x28 **FINISH:** Black Cerakote

## CZ INTEGRAL 22 LR

If it weren't for the endcap, this suppressor would be completely unnoticeable — that is until the trigger is pulled. Then it still might go unnoticed, since with sub-sonic ammo the loudest report will be that of the striker falling.

Built into one of our standard 455/457 Varmint barrels, the Integral utilizes the same patented screw-in baffle system as our stand-alone Rimfire suppressor on the opposing page. Using the included tool, the owner can thread the baffles in to pre-designated locations within the forward threaded suppressor portion of the barrel. If they wish, they can tune baffle lengths to their liking, finding just the right combination for their load of choice.

Baffles and endcaps are cut from 7075 aluminum, meaning between the hollowing out of the barrel and the lightweight suppressor components, the .866" diameter Varmint barrel experiences some weight loss while still measuring in at 20.9".

Rimfire ammunition is notoriously dirty, resulting in the buildup of carbon and lead in rimfire suppressors. To enable easy cleaning, each baffle has six cutters milled into it, letting it function much like a tap to cut its way through the accumulated crud. Just like with a tap, a few spritzes of oil will aid in cutting. The recommended cleaning interval for our rimfire suppressors is every 300 rounds.

**CAL:** 22 LR **FINISH:** Blue/black Cerakote

### MODEL VARIANTS:

- CZ **Integral 17 HMR** — Chambered in 17 HMR, 20.9"
- CZ **Integral 22 LR** — Chambered in 22 LR, 16.9"
- CZ **Integral 17 HMR** — Chambered in 17 HMR, 16.9"

SUPPRESSORS

# SUPPRESSORS

## CZ S2 TI REFLEX

With increasing use of Scorpions by Law Enforcement, we knew the time was quickly approaching when we'd need suppressed variants to meet the demands of some of the special units we work with. Not only that, we needed a suppressor that could maximize the available real estate of the Scorpion package while keeping the overall length as short as possible.

The resulting gun is the Scorpion EVO 3 S2 Micro — found on page 9 in pistol form. The can to match needed to be something that we couldn't source in the marketplace, requiring us to make it ourselves. Utilizing reflex, we were able to achieve the suppression of large cans but in a much more compact package. Comparing it directly to a standard Scorpion with one of the most popular micro 9mm cans on the market, the combo of the Scorpion Micro and the S2 reflex are nearly 3" shorter, while further dampening the report by almost 10 dB!

A fully-welded titanium can, the S2 Ti reflex is designed to fit under an HB Industries or Manticore Arms handguard, allowing it to have a 2" reflex blast chamber and giving it the volume of much larger cans while only protruding from the muzzle 5.83 inches. This full titanium can weighs in at just 9.6 ounces and spits out 147-grain defensive loads at well under 130 dB.

For Scorpion owners who want the benefits of the S2 suppressor but at a more favorable price point, the S2 SS is the same fully-welded reflex design executed in 17-4 stainless steel. The stainless construction comes with a little more weight, though the less costly material cuts \$330 from the MSRP.

This is a direct-thread for Scorpion Micros and Carbines, while most Pistols will require the addition of an aftermarket free-floating handguard.

**CAL:** 9mm Luger **FINISH:** Black Cerakote

### MODEL VARIANT:

- CZ **S2 SS Reflex** — Stainless steel construction

## CZ 5.56 TI REFLEX

Combining light weight, superb suppression and short installed length, our centerfire reflex cans sport a very distinctive shape. To shave the ounces, each titanium baffle is turned down on a lathe until it possesses just the right amount of material to withstand the pressures of full-auto use. The swirled shape of the internal baffle structure is reflected in its exterior, and each baffle is welded to the next until the stack exhibits a very unique silhouette. Not only does this eliminate extra material that would simply add weight, it also increases surface area for heat dissipation.

The endcap and mount are replaceable, and each can is shipped with a 3" reflex mount that allows the user to boost the internal can capacity greatly without increasing the overall length when assembled, with a standard flush mount also included for use on firearms that won't allow for the reflex. Threaded 1/2x28 in 5.56, it is rated for full-auto use.

**CAL:** 223/5.56x45 NATO and smaller **FINISH:** Black Cerakote

### MODEL VARIANTS:

- CZ **7.62 Ti Reflex** — Rated up to 300 Win. Mag., 5/8x24 thread
- CZ **338 Ti Reflex** — Rated up to 338 Lapua, 3/4x24 thread

The included 3" reflex mount should be used whenever possible to boost internal volume, reduce decibel levels and lower tone.

*Handguns*

# CZ-USA P-10

## U.S.-MADE CZ P-10s

After several years of hard work, production of CZ pistols is in full swing at our Kansas City, Kansas, headquarters. Incorporating some small changes, these U.S.-made pistols are ever so slightly different than the versions coming out of our parent factory.

Shown on the opposite page are the P-10 S, C and F in their Optics-Ready configurations. Shipped with a blank fill plate, users can purchase mounting plates for the Trijicon RMR and Leupold DeltaPoint Pro, with more plates coming available down the road. Also available are cowitness sights designed specifically for each of those optic systems, as well as specific suppressor-height sights.

For sights, U.S.-made P-10s feature a single tritium lamp in the front with a large orange surround and a serrated black rear.

All P-10s migrate to a swappable mag release for 2019. With a change in style as well as geometry, this new mag release is smoother than the ambidextrous release it replaces. A few minutes work reverses the release so that lefties can hit it with their thumb from the right side of the pistol.

The two major points that put the original P-10 C on the map were the superb ergonomics and the crisp, light trigger. These updated pistols are no different — they still feel right in the hand much like the classic CZ 75 and their trigger feel is at the top of the class when it comes to striker-fired pistols. With a solid wall, a clean break and a tactile, audible reset, the P-10's trigger leaves many other striker guns in its dust.

Built to withstand the rigors of military use, its fiber-reinforced polymer frame and hardy nitride finish are made for the daily grind. A generous triggerguard allows use with gloved hands while being undercut to allow as high a grip as possible.

With CZ reliability, engineered ergonomics and a bevy of features both familiar and new, the P-10 is the complete package.

**CAL:** 9mm Luger **FINISH:** Nitride/black polymer

### MODEL VARIANTS:

- CZ-USA **P-10 F Optics-Ready** — 19+1 capacity
- CZ-USA **P-10 C Optics-Ready** — 15+1 capacity
- CZ-USA **P-10 S Optics-Ready** — 12+1 capacity
- CZ-USA **P-10 S** — 12+1 capacity

# CZ P-10

## CZ P-10 F OD GREEN

With an OD Green frame and a set of tritium 3-dot night sights, this full-size P-10 holds 19 rounds in the magazine and has the new swappable mag release. Built with the same crisp trigger and engineered ergonomics that have made the P-10 platform a favorite, the full-size frame of the F brings a longer sight radius, longer barrel and longer grip for more consistency and control.

CAL: 9mm Luger FINISH: Nitride/OD green polymer

### MODEL VARIANTS:

- CZ P-10 F — Black frame, standard 3-dot sights
- CZ P-10 C — Black frame, compact size, 15+1 capacity, standard 3-dot sights

## CZ P-10 F FDE

Ditching the black frame for one in Flat Dark Earth, this P-10 also gets a set of 3-dot tritium night sights.

CAL: 9mm Luger FINISH: Nitride/FDE polymer

### MODEL VARIANT:

- CZ P-10 C FDE — Compact size, 15+1 capacity

## CZ P-10 F SUPPRESSOR-READY

With an extended barrel threaded 1/2x28, this striker-fired pistol can fill every role — from range-day plinker or duty weapon to bedside protector with a light and compact can. High night sights give good visibility over most 9mm cans while the extended mag bases boost capacity by 2 rounds.

CAL: 9mm Luger FINISH: Nitride/black polymer

### MODEL VARIANT:

- CZ P-10 C Suppressor-Ready — 17+1 capacity

## CZ URBAN GREY SUPPRESSOR-READY SERIES

Clad in an urban grey color, this series of pistols has a set of high suppressor sights equipped with tritium lamps front and rear. Extended capacity magazines are used wherever possible, boosting capacities on all but the SP-01 by 2 rounds. This gives the P-10 F and P-09 an impressive 21+1!

CAL: 9mm Luger FINISH: Nitride/Urban Grey polymer

### MODEL VARIANTS:

- CZ P-10 F Urban Grey Suppressor-Ready — 21+1 capacity
- CZ 75 SP-01 Tactical Urban Grey Suppressor-Ready — 18+1 capacity
- CZ 75 B Urban Grey Suppressor-Ready — 18+1 capacity, swappable safety/decocker
- CZ 75 P-01 Urban Grey Suppressor-Ready — 16+1 capacity, swappable safety/decocker
- CZ P-09 Urban Grey Suppressor-Ready — 21+1 capacity
- CZ P-07 Urban Grey Suppressor-Ready — 17+1 capacity
- CZ P-10 C Urban Grey Suppressor-Ready — 17+1 capacity

# CZ P-09

## CZ P-09

For those who prefer the double-strike capability of the CZ 75 DA/SA hammer-fired system, the P-09 is our full-size service pistol. Boasting an impressive 19+1 rounds in its flush-fitting magazine, its capacity is unsurpassed by any other service pistol.

With the versatile Omega trigger system, the P-09 is shipped with ambidextrous decockers installed but can easily be converted to ambi manual safety with the supplied parts and instructions.

Also included are small, medium and large backstraps that allow users to customize the pistol's grip to their hand while retaining the natural point of aim that CZ handguns are known for.

With an integrated 1913 Picatinny rail, the P-09 is readily adaptable to low-light situations. The Omega DA/SA trigger provides a crisp single-action trigger break while providing the safety of a DA first-pull option.

**CAL:** 9mm Luger **FINISH:** Nitride/black polymer

### MODEL VARIANT:

- CZ P-09 OD Green — OD green frame

# CZ P-07

## CZ P-07 OD GREEN

Our compact polymer DA/SA pistol, the P-07 shares all of the features of the P-09, just in a much smaller package. The same Omega trigger system allows users to easily swap from a manual safety to a decocker depending on their preference. With a 15+1 round capacity, it makes for a concealed-carry firearm without sacrificing round-count.

A Picatinny light rail on the dustcover enables it to pull duty at the bedside with a light/laser and the metal 3-dot sights are easy to acquire at the range. Three interchangeable backstraps allow shooters with small or large hands to tune it to fit their grip.

The P-07 is shipped with ambidextrous decockers installed but can easily be converted to an ambidextrous manual safety with the supplied parts and instructions.

**CAL:** 9mm Luger **FINISH:** Nitride/OD green polymer

### MODEL VARIANT:

- CZ P-07 — Black polymer frame

## CZ P-07 SUPPRESSOR-READY

Loaded with features but without all the flash of the Urban Grey series, the standard black P-07 Suppressor-Ready comes with high night sights and extended magazine bases in addition to the obligatory extended, threaded barrel (1/2x28).

**CAL:** 9mm Luger **FINISH:** Nitride/black polymer

### MODEL VARIANT:

- CZ P-09 Suppressor-Ready — Full-size model, 21+1 capacity

# FULL-SIZE

## TIMELESS DESIGN, SUPERB PERFORMANCE

On October 12, 2007, we built the 1 millionth CZ 75 – a testament to its popularity worldwide. Designed in 1975, the CZ 75 was one of the first “Wonder Nines” — 9mm pistols that combined high capacity with a double-action trigger system. With a signature slide-in-frame design, an entire family of pistols has been developed around the CZ 75 design, including compacts, decockers, single-action only, ambidextrous, alloy frames and even competition pistols.

Following a steady rise in popularity within USPSA, results from the 2014 Production Nationals showed that CZ pistols are now used by more competitors than any other brand of pistol. Ergonomics, shootability and reliability of the 75 platform leave the other production pistols wanting.

### CZ 75 PLATFORM COMMON FEATURES

- High-capacity, double-stack magazine
- Hammer-forged barrel
- Ergonomic grip and controls
- Unparalleled accuracy
- Slide-in-frame design for better recoil control
- 3-dot sighting system (tritium night sights available)
- Extended service life due to advanced design and superior materials
- Firing-pin-block safety (on most models)

✓ = CALIFORNIA DOJ APPROVED 

### CZ 75 B Ω CONVERTIBLE

A further evolution of the 75 B Ω (Omega), the new Convertible version allows users to swap from decocker to safety operation in the same manner as our popular P-07/P-09 pistols. Using the same simplified, more robust variation of the 75's trigger system as the previous Omega, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

CAL: 9mm Luger FINISH: Black polycoat

#### MODEL VARIANTS:

- CZ 75 B 9mm Luger — Classic CZ 75 trigger system ✓
- CZ 75 BD 9mm Luger — Decocking lever ✓

### CZ 75 B MATTE STAINLESS

The CZ 75 B Stainless is the first stainless steel firearm to bear the CZ name. With the exception of an ambidextrous manual safety and rubber grips, the stainless version is functionally identical to the CZ 75 B. The biggest difference is an improvement in corrosion resistance, though many will argue there is an improvement in appearance as well.

CAL: 9mm Luger FINISH: Matte stainless

#### MODEL VARIANT:

- CZ 75 B High Polish Stainless

### CZ 75 SP-01 ✓

A stand-out as one of the most popular pistols in our extensive lineup of CZ 75 variants, the SP-01 has a reputation for shootability and reliability. Originally designed as a military and law enforcement duty sidearm, its exceptional accuracy and handling characteristics have found it a home in the world of competitive shooting. For that reason, SP-01s and SP-01 Shadows (see page 34) have risen to become the gun of choice for competitors at USPSA Production Nationals.

With an integral Picatinny-style rail on the dustcover, rubber grip panels and a set of tritium night sights, the SP-01 is equally adept as a home-defense firearm as it is clanging steel on a range. CZ's two-stage finish of a hardy phosphate base and the corrosion-resistant black Polycoat outer layer are built to withstand the rigors of military use, meaning holster wear and rough treatment may leave it scuffed but otherwise unaffected.

Borrowing from the improved grip geometry of the compact P-01, the SP-01 utilizes an extended beavertail to protect the shooter's strong hand as well as allowing for a deeper and more secure grip. The grip geometry, checking in key areas on the frontstrap and backstrap, and redistribution of mass provided by the accessory rail, noticeably decreasing the perceived recoil from standard 75 models and allowing for more rapid target acquisition and transition.

CAL: 9mm Luger FINISH: Black polycoat

#### MODEL VARIANTS:

- CZ 75 SP-01 Tactical — Ambidextrous decocking levers
- CZ 75 SP-01 Phantom — Polymer frame, two backstraps, decocking lever

# COMPACT

## CZ 75 COMPACT ✓

At 5" tall with a barrel length of just under 4", the compact model shaves a little more than 3/4" off the length and about 1/2" off the height of the full-size CZ 75. This reduced size allows it to readily disappear under regular clothing, while the steel frame still makes it comfortable to shoot for extended sessions at the range. Equipped with a manual safety, it is able to be carried cocked and locked, or manually decocked for a double-action first pull and SA thereafter.

CAL: 9mm Luger FINISH: Black polycoat

## CZ 75 P-01 Ω CONVERTIBLE

Incorporating our swappable Ω (Omega) trigger system, the P-01 Ω can be converted from decocker to safety operation with minimal tools. Using the same simplified, more robust variation of the 75's trigger system as previous Omega models, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

The P-01 platform was designed for LE and military duty, but its compact size and the reduced weight due to the forged alloy frame made it ideal for discrete carry as well. Its aircraft-aluminum 7075 frame sheds weight, while the dust cover-mounted rail allows a user to add a light or laser.

CAL: 9mm Luger FINISH: Black polycoat

### MODEL VARIANT:

- CZ 75 P-01 — 9mm Luger, decocker only, standard 75 trigger system ✓

## CZ 75 D PCR ✓

Thanks to its forged 7075 aluminum frame, the PCR weighs a full 1/4 pound lighter than the 75 Compact, making it more comfortable for everyday carry. Equipped with a decocking lever, it is designed to be decocked before holstering. After decocking, the trigger safety is much like that of a double-action revolver. While there is no need to flip a safety lever off, the relatively longer and heavier trigger pull for the first round requires a conscious decision to pull the trigger before firing. Other additions to the PCR include rubber grip panels, serrated frontstrap and backstrap for improved handling, low-drag sights and a loaded-chamber indicator.

CAL: 9mm Luger FINISH: Black polycoat

# SUB-COMPACT

## CZ 2075 RAMI B ✓

With a 3" barrel and an unloaded weight of less than 26 ounces, the black polycoat, alloy-framed RAMI is ideal for concealed carry.

Based on the proven CZ 75 line of pistols, the RAMI is double action/single action, allowing it to be carried in different conditions depending on the shooter's preferences.

Incorporating the CZ double-stack magazine design, the little RAMI ships with a 10-round, flush-mount magazine and 14-round extended magazine. A low-capacity-compliant version of the 9mm is available with two 10-round magazines.

CAL: 9mm Luger FINISH: Black polycoat

### MODEL VARIANT:

- CZ 2075 RAMI BD — Decocking lever instead of safety

# FULL-SIZE 45 ACP

## CZ 97 B

The CZ 97 B is the big-bore brother to the CZ 75 B — the first CZ pistol produced in 45 ACP. It is operationally identical to the 75 B (SA/DA, firing pin block safety and magazine brake). Features include a screw-in barrel bushing, loaded-chamber indicator and a double-stack magazine holding 10 rounds. The thin aluminum scales slim the grip down to make it comfortable for even those with smaller hands, and the fiber-optic front sight and two-dot rear make it great at the range.

**CAL:** 45 ACP **FINISH:** Black polycoat

A special version of the 97 B is specifically made for the California market, so check with your local CZ-USA Authorized Dealer for availability. SKU of this pistol is 01401.

## CZ 97 BD

Just as the standard 75 has a decocker variant, so does the 97. For those who prefer the heavy double-action first pull, the BD model adds a manual decocker to help drop the hammer to half-cock.

The 97 BD shares many of the features of the B model, including its hardy black polycoat finish and thin aluminum checkered grips. Besides the decocker, the BD also adds a set of 3-dot tritium night sights.

**CAL:** 45 ACP **FINISH:** Black polycoat

# 22 LR KADET KITS

## CZ KADET II ADAPTER

The original CZ "Kadet" kit, this adapter allows owners of CZ 75-pattern pistols to fire cheaper 22 LR cartridges for practice or plinking.

Included are two 10-round magazines that fit flush with the grips of the full-size CZ 75 and SP-01 models. The Kadet II conversion kit will work on CZ 75 compact models including the P-01, P-06 and PCR, but the full-size magazines will extend below the bottom of the compact grips of these models. The Kadet II conversion will not work on the 97, 75 TS or any polymer models. The P-01, PCR and certain other compact models use a specific slide stop. On 85s, the Kadet slide stop will not work; the factory 85 stop must be used, which won't allow for last-round hold-open.

**CAL:** 22 LR **FINISH:** Black polycoat

## CZ SHADOW 2 KADET KIT

Affording Shadow 2 owners a cheaper plinking option, the Shadow 2 Kadet converts the 9mm Shadow 2 over to a blow-back 22 LR, allowing shooters to use their competition belts, mag holders and any frame-mounted modifications or accessories. Ships with two 10-round magazines.

**CAL:** 22 LR **FINISH:** Black anodized

### MODEL VARIANT:

- CZ **SP-01 Kadet Kit** — Shorter slide to fit SP-01 models

## CZ P-09 KADET KIT

Built specifically for our polymer hammer-fired pistols, this all-aluminum Kadet adapter gives P-09 and P-07 owners the ability to get plenty of practice without the expense that usually comes with it. Topped with a set of serrated target sights borrowed from the Shadow 2, the P-09 Kadet Kit ships with two magazines.

**CAL:** 22 LR **FINISH:** Black anodized

### MODEL VARIANT:

- CZ **P-07 Kadet Kit** — Shorter slide and magazines to fit compact P-07 models

CZ SHADOW 2 BLACK & BLUE

In recent years, the SP-01 Shadow has taken the competition circuit by storm. In the USPSA Production Division, CZ pistols are now used by twice as many top-level competitors than any other maker.

Given that popularity, it was high time to up the ante. Starting from scratch, CZUB engineers took the best features of the original Shadow and improved upon them. More than two years later the Shadow 2 emerged, bearing the fruits of their efforts.

With a higher beavertail and undercut triggerguard, the shooter’s hand is able to be as close to the bore axis as possible. With a contoured slide, the majority of the reciprocating mass is contained below the bore, equating to less muzzle flip. Increased weight at the dust cover/rail also helps keep the muzzle down.

The Shadow 2’s swappable mag release has an adjustable, extended button with three settings to allow shooters to set it in the spot most comfortable for them. Also included in the box is an extended ambidextrous safety set and a number of buffers for use with lighter springs and/or hotter rounds.

Best of all, new trigger components give smooth DA and crisp, clean SA trigger pulls while drastically reducing trigger reset.

A hardy nitride finish coats the entire pistol, leaving it nearly impervious to corrosion, with an additional layer of our proprietary black Polycoat on the frame. Thin blue aluminum grips have healthy checkering to match the fine front and backstrap checkering of the pistol itself. Sitting atop the slide are a set of target sights — fiber optic on front and a serrated, black HAJO rear (click adjustable for elevation, drift adjustable for windage).

CAL: 9mm Luger FINISH: Black polycoat/nitride, blue grips

MODEL VARIANT:

- CZ Shadow 2 Urban Grey — Nitrided, coated in Urban Grey polycoat, black aluminum grips.

CZ 75 TACTICAL SPORT ORANGE

Turning the Tactical Sport up a notch, the Orange borrows a number of design features from the Czechmate and incorporates a few of its own. With the slimmer triggerguard, revised grip geometry and finer checkering from the Czechmate frame, it adds a thumb stop and fully adjustable target sights.

With the same long slide and full-length dust cover as the standard TS, it also shares the single-action-only trigger, giving it an incredibly light pull and short reset, making it a joy to shoot at the range and instinctual in competition.

CAL: 9mm Luger FINISH: Black polycoat, orange grips/mag bases

MODEL VARIANT:

- CZ 75 Tactical Sport Orange — 40 S&W

CZ CZECHMATE

The Czechmate is an out-of-the-box USPSA Open gun with all the extras to shoot Limited as well. Featuring the same fine checkering as the TS Orange, the Czechmate is equipped with a C-MORE® red-dot sight and four-port compensator and is built to run major power factor ammunition.

More than just a one-trick pony, the comp and brake can be easily swapped over to a Limited division setup. To make the transition, a spare barrel is included along with a front sight adapter to replace the compensator and a rear sight to replace the slide racker handle. A big stick, 26-round magazine and three 20-round magazines are included in the CZ hardcase.

CAL: 9mm Luger FINISH: Black polycoat

When it comes to tuned competition CZs, there's no one who builds more of them each year than Angus Hobdell, owner of CZ Custom. Angus has been building pistols for us for the better part of a decade, with his shop becoming the de facto CZ-USA custom pistol shop. Each year we partner with him to build a handful of models that combine the best parts available to meet the varying needs and budgets of competitive shooters. Check out CZ Custom at [czcustom.com](http://czcustom.com).

**NEW**

## CZC A01-LD

Built from scratch at CZ Custom, the A01 is the evolution of the Shadow series as Angus would have done it.

The frame is the star of the show and is hammer-forged, CNC-machined and then blued. Very obvious is its massively heavy dustcover which kills both recoil and muzzle rise. With a deep beavertail, undercut triggerguard, raised 25 LPI checkering and an internal magwell, it combines classic CZ 75 ergonomics with purpose-driven features ideal for competition. To ensure that the trigger is up to snuff, both the hammer and the sear are directly pinned in the frame to solidify trigger pull consistency. DA pull weight is from 8-8.5 lbs. while SA clocks in at 3-3.5 lbs. and a short reset is standard. The trigger itself is lifted from the CZ 85 Combat.

The slide is CNC'd from 4140 bar stock and features front and rear serrations and CZ Custom low-mount rear sight and fiber-optic front.

Icing on the cake is a 4.925" match-grade bull barrel made from 416 stainless steel.

Built for the higher capacity P-09/P-07/P-10 magazine platform, the A01-LD ships with two 19-round P-09 magazines.

Made in Mesa, AZ, USA.

## CZ ACCUSHADOW 2

Leave it to CZ Custom to take the Shadow 2 to the next level! To anchor the muzzle in the slide, their new ¼-turn, 1911-style AccuBushing makes the pistol capable of sub-3" groups at 50 yards. A custom hammer further lightens and smooths the DA and SA pulls, while the reset is shortened with a hand-fit disconnect. Whether you're after outstanding accuracy, an edge in competition or just plain fun — the AccuShadow 2 can deliver!

**CAL:** 9mm Luger **FINISH:** Black polycoat

## CZ 75 SP-01 SHADOW TARGET II

The Target II is a competition-ready pre-B-style SP-01 Shadow, featuring a CZ Custom trigger job with a short-reset trigger, fully adjustable rear sight, fiber-optic front sight, stainless steel guide rod, lighter springs for competition (11-lb. recoil and 13-lb. main), extended magazine release and checkered aluminum grips. It was created by champion shooter Angus Hobdell's CZ Custom Shop to have trigger pulls of 3 to 4 lbs. in SA and 7.5 to 8.5 lbs. in DA.

**CAL:** 9mm Luger **FINISH:** Black polycoat

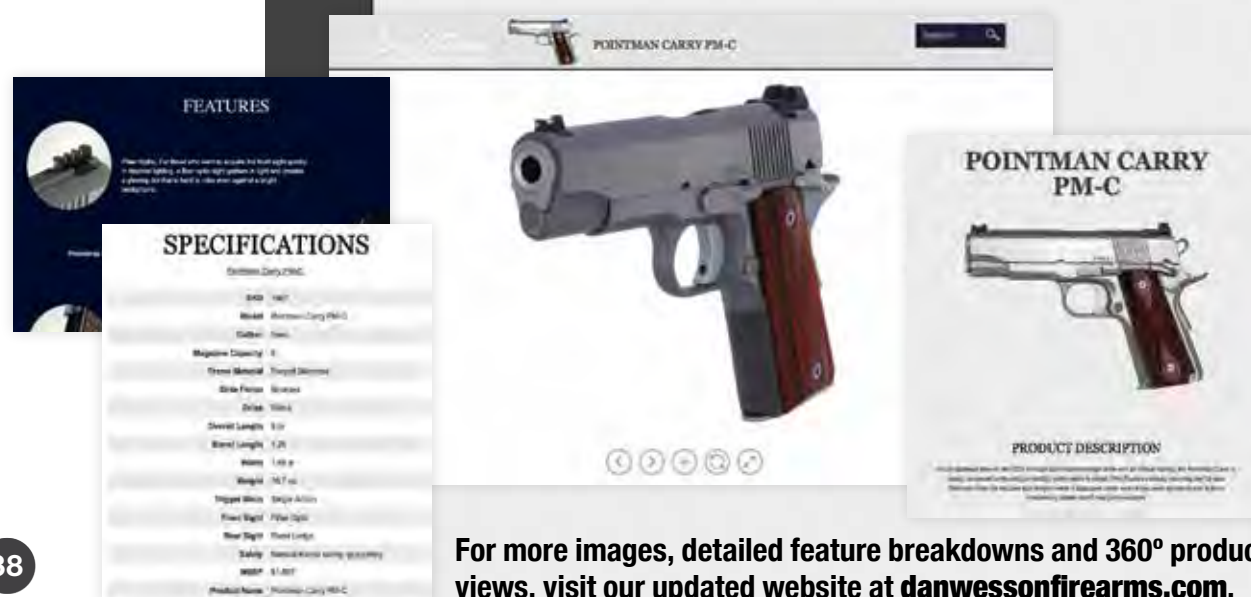

## FEATURES

- Hand-fit 70-series frame and slide
- Forged slides and barrels
- Hand-fit match barrels
- Billet alloy steel fire-control system
- Zero MIM parts
- All premium components
- Lowered and flared ejection port
- Beveled magazine well
- Carry bevel treatment
- Undercut triggerguards
- Hand-polished flats
- Crisp 3.5-5 lb. factory trigger job
- Two magazines
- Signature-series case
- Barrel bushing wrench
- Cable lock and manual

In 1968, Dan Wesson struck off on his own to manufacture fine firearms that deviated from the standard. Fifty years later, the company he founded is still going strong and still building unique products. Though there are many manufacturers of 1911s, not many combine custom-level fitting, top-shelf parts and clean, elegant lines like a Dan Wesson — let alone at such an attainable price.

We produce only a few thousand handguns a year, using the best components and finishes the industry has to offer. We painstakingly hand-fit and polish each and every part, creating the best possible production 1911. Even a custom pistol maker would be hard-pressed to build a gun that would outperform ours straight out of the box. No matter the model, from our entry-level Vigil series to the long-slide Bruin, we are proud to provide our customers the best bang for the buck in the industry.

All our pistols share the same match-grade components, but specific features vary by model. We invite you to find another production 1911 in our price range that gives you everything Dan Wesson has to offer.

**For more images, detailed feature breakdowns and 360° product views, visit our updated website at [danwessonfirearms.com](http://danwessonfirearms.com).**

DW **ECP**

Bringing the heavy, match-grade bull barrel from our Officer-size ECO to a bit bigger platform, the Enhanced Compact Pistol is a 4" gun that conceals well but is a tack-driver at the range. With a compact, stainless steel slide and a forged aluminum frame, weight is kept to a svelte 29 oz. Our new tapered G10 grips and a bolted frame enhance its ergonomics, affording shooters with smaller hands an easier reach to the trigger.

A tri-topped slide wears aggressive side serrations and a top rib to knock down glare, while our new U-notch rear sight is matched to our brass-beaded front sight. The bull barrel itself is flush-cut to make for easier disassembly and has a 30-degree crown. With a similar recoil system to the ECO, it has a flat wire recoil spring that is rated for 15,000 rounds – three times the round count of a typical 1911 dual recoil spring setup.

With a compact size that melts away when concealed and a beefy bull barrel, the ECP is an ideal 1911 for everyday carry.

**CAL:** 9mm Luger, 45 ACP      **FINISH:** Black Duty

DW **TCP**

Combining a match-grade bull barrel and our new railed alloy frame, the Tactical Compact Pistol sits in the sweet spot of concealability and shootability. The TCP for short, its compact stainless slide is tri-topped and has aggressive slide serrations. A top rib helps reduce glare and it features our new U-notch rear sight with a whopping .156" wide notch paired with our brass-beaded front sight.

Its ramped bull barrel has a 30 degree crown and is flush cut for easier disassembly. Its recoil system uses a similar flat wire recoil spring to our ECO. Rated for 15,000 rounds in 45 ACP, that's three times the round count of a typical 1911 dual recoil spring setup.

The TCP's grips are also new, with a tapered profile that is slim at the top and full-width at the bottom, giving shooters with smaller hands an easier reach to the trigger. With three facets that mimic the distinctive slide, their serrated features encourage a high, deep grip. Our one-piece magwell, flat K-style trigger and square hammer round out the features.

All-in, the TCP tips the scales at just 32 ounces, making it an accurate pistol that's easy to carry on the regular.

**CAL:** 9mm Luger, 45 ACP    **FINISH:** Black Duty

DW **VIGIL SUPPRESSOR-READY**

A more affordable entry into the Dan Wesson lineup, the Vigil series pistols are all built around a forged aluminum frame with a stainless slide. The round-top slide wears a tritium sight on the front and a serrated tactical rear. The frontstrap is checkered 25 LPI as is the rear that also features a rounded butt for comfortable carry.

This Suppressor-Ready variant is Government-size with an extended, threaded barrel and high sights with a tritium front.

**CAL:** 9mm Luger, 45 ACP    **FINISH:** Black Duty

**MODEL VARIANT:**

- DW **Vigil** — Standard non-threaded Match barrel and standard-height sights

DW **VIGIL COMMANDER**

With the same features as the Government-size Vigil, this shorter Commander drops some weight due to its shorter barrel and slide, making it a mid-size pistol that remains incredibly shootable while being easier to carry on-body all day.

**CAL:** 9mm Luger, 45 ACP    **FINISH:** Black Duty

DW **VIGIL CCO**

Rounding out the Vigil series, the CCO variant combines a sub-compact Officer frame with a compact Commander slide and barrel. Ideal for concealed carry, it is light as can be while retaining the sight radius of a Commander model, making it very shootable.

Like all of the Vigil pistols, the Vigil CCO wears a set of Cocobolo Shadow grips, a forged aluminum frame with 25-LPI frontstrap checkering and a round-top slide with a tactical sight in the rear and a tritium night sight in the front.

**CAL:** 9mm Luger, 45 ACP    **FINISH:** Black Duty

DW **A2 PARKERIZED**  
**(LIMITED PRODUCTION)**

Introduced last year to rave reviews, the A2 is our vision of what the 3rd generation of the military 1911 could have looked like. New for 2018 is a Parkerized version, even further standing as a testament to the most-copied pistol design in history.

A lowered and flared ejection port, modern combat sights, tactical beavertail and an extended thumb safety as well as a hint of undercutting to the trigger guard make this one combat-ready pistol.

Starting with a forged steel frame and slide, the A2 is built using top-shelf parts, with each component being hand-fit. Parts are blended by hand, then it is bead-blasted and finished in either the shown Parkerization or a matte blue.

Double-diamond walnut grips give it a classic look while the stainless steel match barrel and tight slide-to-frame fit ensure that it's no slouch in the accuracy department.

**CAL:** 45 ACP    **FINISH:** Parkerized

- DW **A2** — Matte-blue finish
- DW **A2 Commander** — Matte-blue finish, Commander-length slide/barrel

DW **WRAITH**

Anyone who's been paying attention to the development of the CZ and Dan Wesson lines in recent years will have noticed a trend — many more Suppressor-Ready pistols. The Wraith is a threaded Government-size 1911 available in 45 ACP, 10mm or 9mm and wears a distressed version of our Duty finish. A stainless pistol underneath this mottled exterior, any parts that aren't distressed are blacked out.

Some grippy stippled G10 grips are cut short to accommodate a magwell and the slide wears an abbreviated set of forward serrations and a set of high night sights.

**CAL:** 9mm Luger, 10mm Auto, 45 ACP    **FINISH:** Distressed Duty

DW **RAZORBACK RZ-10**

Our Razorback has always been our most popular 10mm platform. The RZ-10 is a 5" 1911 and features the serrated target rib machined on the top of the slide with fixed defensive sights. We fit a match-grade, ramped barrel for use of the most popular 10mm loads and smoother feeding. The slide is mated to our standard forged frame with undercut triggerguard and smooth frontstrap. On both the frame and the slide, we polish the flats to a soft brushed finish and sandblast the rounds. The gun is finished off with a nice set of double-diamond Cocobolo grips. Chambered in the powerful 10mm cartridge, the RZ-10 is a very versatile 1911 package suitable for defensive use, target shooting and handgun hunting of medium-sized game up to deer or wild boar.

**CAL:** 10mm    **FINISH:** Brushed/bead-blasted stainless steel

DW **BRUIN**

With more folks than ever choosing to hunt with a handgun and the continuing resurgence of the 10mm cartridge, we decided it was time to bring the heat. Our first long-slide 1911, the Bruin was born to hunt. The long slide means a long sight radius and the 6" barrel within allows full-power 10mm loads as much time as possible to use their powder charge. Fully adjustable tritium sights ensure that when shooting hours arrive, you'll be able to see the sights. Not only that, but we're using a tritium/fiber-optic combo front sight to make sure the front glows day or night.

**CAL:** 10mm    **FINISH:** Two-tone black/bronze Duty

**MODEL VARIANT:**  
• DW **Bruin Black** — 10mm or 45 ACP, black Duty finish, red/black G10 grips

DW DISCRETION

With suppressors becoming more and more mainstream, the Discretion's match-grade stainless barrel is extended and threaded to make it a ready host. Its aggressively ported slide helps make up for the added weight of a can out front, while its serrated trigger and competition-inspired hammer give it a look all of its own.

High tritium sights allow for sighting over the top of most pistol suppressors, with a rear designed so that the slide can be racked on a belt if using the pistol one-handed.

CAL: 9mm Luger, 45 ACP FINISH: Black Duty

DW DISCRETION COMMANDER

This shorter, Commander-length version of the Discretion might actually be a better suppressor host than its 5" big brother. By reducing slide and barrel length, weight is removed from the muzzle end, meaning once your suppressor of choice is attached it's much less muzzle-heavy than its Government-sized counterpart.

CAL: 9mm Luger, 45 ACP FINISH: Black Duty

DW SPECIALIST DISTRESSED

When police departments approached us to build a more reliable, durable 1911 to replace what they had been carrying, we developed a model just for them. Additions that made it ideal for law enforcement also made it perfect for home defense, so we gladly offered it for sale to the public.

The frame sports an integral 1913 Picatinny rail, 25-LPI frontstrap checkering, undercut triggerguard and recessed slide stop to enable the installation of laser grips. Equipped with an ambidextrous thumb safety, extended magazine release and magwell, the Specialist is operator-friendly. It is finished off with a set of G10 grips that guide the hand into the beavertail and hold it there. The Specialist ships with two 8-round magazines with bump pads and is available in either a matte stainless finish or our black Duty finish, which makes for an especially hardy pistol that scoffs at everyday wear and tear.

The forged stainless steel slide wears our popular Clark-style serrated rib with a single amber tritium dot in the rear sight and a green lamp with white target ring in front.

CAL: 9mm, 45 ACP FINISH: Distressed Duty finish over stainless steel

MODEL VARIANTS:

- DW Specialist — 9mm or 45 ACP, full-size frame and slide, matte-stainless finish
- DW Specialist Black — 9mm or 45 ACP, black Duty finish

DW SPECIALIST COMMANDER

A more compact version of the Specialist, this Commander variant carries all the same features but with a shorter slide and 4.25" barrel.

CAL: 9mm, 45 ACP FINISH: Matte-stainless steel

MODEL VARIANTS:

- DW Specialist Commander Black — 9mm or 45 ACP, black Duty finish
- DW Specialist Commander Distressed — 45 ACP, distressed Duty finish, black grips

DW POINTMAN NINE (PM-9)

The Pointman series has been offered in limited quantities in the past, and demand always outpaces production capacity. Featuring our serrated rib on top of the forged slide, it has an adjustable target sight in the rear and fiber-optic sight in the front, and front and rear cocking serrations. The frame is forged stainless with an undercut triggerguard and 25-LPI frontstrap checkering. The flats are polished to a soft brushed finish, and the rounds are sandblasted for a nice contrast. Double-diamond Cocobolo grips finish it off. With the lower cost of 9mm ammunition and mild recoil, this is the perfect model for getting acquainted with the 1911. Holding 9+1 rounds, the PM-9 shines both at the range and in competition.

CAL: 9mm Luger FINISH: Brushed/bead-blasted stainless steel

- MODEL VARIANTS:
- DW Pointman 38 (PM-38) — 38 Super
  - DW Pointman 45 (PM-45) — 45 ACP

DW POINTMAN CARRY (PM-C)

A fully stainless take on the CCO concept (Commander-length slide with an Officer frame), the Pointman Carry is easily concealed while being incredibly comfortable to shoot. With features closely mirroring the full-size Pointman Nine, its reduced grip length makes it disappear under even thin cover garments and its stainless frame helps soak up recoil. Aiding this are a round butt mainspring housing, bobbed grip safety, low-profile slide stop and a tactical thumb safety.

Besides its size, a few key differences set it apart from the full-size Pointman series. Lack of forward serrations and a fixed combat rear sight help make it better in its role as an every day CCW.

CAL: 9mm Luger, 38 Super, 45 ACP FINISH: Brushed/bead-blasted stainless steel

DW POINTMAN SEVEN (PM7)

While the differences between it and the PM-45 are few, they are enough that the PM-45 is deemed an entirely different gun and can't be sold in the state of California. Not "safe" enough, or something along those lines.

With legacy features, the PM7-45 is as the Pointman was first configured many years ago — with an adjustable rear target sight, blacked-out front sight and forward serrations. A smooth front strap, 25-LPI rear strap and double-diamond Cocobolo grips secure the pistol in the hand, and flats are brushed and rounds are bead-blasted.

CAL: 45 ACP FINISH: Brushed/bead-blasted stainless steel

DW HERITAGE RZ-45

The Heritage is our entry-level 1911, allowing shooters to experience Dan Wesson quality at the most affordable price possible. Even though this model is our most economical, it features all the same quality components that we use in our 1911 models. A Government-size model, it has a 5" barrel and is chambered in 45 ACP. The slide features our serrated rib and wears a tritium front sight and plain black, snag-free rear. The sides of the slide have a nice brushed polish on the flats, while the rounds are sandblasted to match the matte forged frame with undercut triggerguard and smooth frontstrap. Grips are rubber Double Diamonds by Hogue®. The Heritage is a great introduction to the Dan Wesson 1911 experience, and we are confident it will become an heirloom, handed down from generation to generation.

CAL: 45 ACP FINISH: Brushed/bead-blasted stainless steel

DW COMMANDER CLASSIC BOBTAIL

Produced only in small numbers in recent years, a resurgence in demand means we brought the Commander Classic Bobtail back into regular production. One of the few California-legal models in our 1911 line, it has a loyal and growing following in the Golden State. With stainless steel slide and frame, its flats are brushed and rounds are bead blasted. With snag-free tritium sights and a bobbed mainspring housing, it's an excellent candidate for concealed carry.

CAL: 45 ACP FINISH: Brushed/bead-blasted stainless steel

DW GUARDIAN

We've had many requests to produce a Commander-sized 1911 in 9mm. In response, we've revived one of the early Dan Wesson 1911 models with a twist. We have combined the best features from two of our most popular models, the Bobtail\* Commander and the CCO. The new Guardian has an anodized-aluminum, bobtail frame and an aluminum mainspring housing to help reduce printing when carrying concealed and make it comfortable enough for full-time carry. The black Duty-finished, Commander-length slide and alloy frame give it just the right feel and balance. If you are looking for a lightweight, Commander-sized 1911 in 9mm, 38 Super or 45 ACP, don't pass up the Guardian.

\* Ed Brown Bobtail®

CAL: 9mm Luger, 38 Super, 45 ACP FINISH: Black Duty finish/black anodized

DW ECO

We wanted to give our customers the smallest, lightest gun we could without sacrificing accuracy, dependability and stopping power. Enter the ECO — a single-stack, Officer-size 1911 that weighs only 25 oz. For years, the Officer model has been criticized for its reliability. We have conquered that by using the latest technology and doing what others say can't be done. The recoil system is quite unique for this style of 1911, using a solid, one-piece guide rod and a flat recoil spring that is rated for 15,000 rounds in 45 ACP — 15,000 rounds — not 500 like most 1911 dual recoil systems are rated for. With longevity unheard of in a production 1911, it also gives the benefit of a smooth slide for easier operation and less felt recoil.

The lightweight 3.5" slide is topped with tritium night sights with our tactical rear, which allows for easy one-handed racking. The ECO barrel is a flush-cut, ramped bull barrel with a target crown rather than the traditional barrel bushing setup, allowing it to be more compact and easier to disassemble.

The frame is anodized aluminum and features an undercut triggerguard and 25-LPI checkering. The mainspring housing is also aluminum with 25-LPI checkering and a rounded bottom corner for concealability and shooting comfort. The enhanced grip safety and slim-line G10 grips really plant the pistol in your hand, allowing for faster follow-up shots and better recoil control. Just like the Guardian, the ECO's slide and small parts receive the Duty finish, and it's available in both 9mm and 45 ACP.

We set out to conquer the Officer model and did just that. The ECO is compact, extremely lightweight and raises the bar for reliability. Pick up an ECO — you won't be disappointed.

CAL: 45 ACP FINISH: Black Duty finish/OD green anodized

MODEL VARIANT:

- DW ECO — Black frame, black/white G-10 grips, 9mm or 45 ACP

DW 715 PISTOL PACK (LIMITED PRODUCTION)

The 715 is as it was before — designed and built to be the most accurate, rugged and versatile revolver on the market. Famous for its swappable barrels and tack-driving accuracy, the 715 Pistol Pack is shipped with 4", 6" and 8" barrel/shroud assemblies in the modern heavy, vent-shroud profile, the weight of which tames the recoil of the 357 Magnum very well.

Like its famous predecessors, barrel assemblies and grips are easily swapped by the shooter, and the 715 accepts grips and barrel/shroud assemblies from 15-2 model and newer revolvers. The tensioned barrel of the DW interchangeable barrel system enhances accuracy, pulling the barrel tight like a guitar string, enabling it to vibrate at the same frequency every time.

The forward crane latch, located in front of the cylinder and paired with a rear ball detent, helps to ensure proper cylinder/barrel alignment during firing. While the tensioned barrel definitely improves accuracy over other revolvers, it's that consistent cylinder/barrel alignment that contributes most to the accuracy of the design. Additionally, the clockwise-rotating cylinder reduces stress on the crane, since it turns in the same direction the crane locks, prolonging service life and keeping everything tight. The 715's frame is robust, built to handle the heaviest of factory loads.

Each Pistol Pack is shipped in a custom Dan Wesson hardcase with compartments for the additional barrel assemblies and a factory-supplied barrel wrench kit.

CAL: 357 Magnum/38 Special FINISH: Brushed stainless steel

# DAN WESSON ELITE SERIES

The Elite Series of 1911s are designed to meet and exceed the expectations of the most demanding competitive and combat shooters. Each model in the Elite line was purpose-built knowing the demands that are placed on these handguns. Every part and component was carefully chosen based on supreme quality and thorough testing. Each is meticulously hand fit, followed by a rigorous function and reliability regimen. What you get are handguns of unparalleled accuracy, rugged reliability and flawless functionality.

## DW FURY

Equipped with a Trijicon RMR and with an extended, threaded barrel, this double-stack beast is begging to be unleashed on paper and steel. Chambered in 9mm or 10mm, capacities are 18+1 and 14+1, respectively. With the absolutely crisp, super-short-reset Elite Series trigger job, can you handle the Fury?

CAL: 9mm Luger, 10mm Auto FINISH: Matte black

## DW TITAN

Turning the most well-known defensive pistol in the world into a true combat handgun was no easy task. Melding caliber and capacity, the Titan is chambered in the monstrous 10mm cartridge, delivering more foot-pounds of energy than a 45 ACP and packing 14 rounds in the magazine, putting to rest the capacity debate. Sight configuration was imperative — the Titan has rugged HD night sights that are moved forward and recessed deep into the slide, yielding target accuracy and extreme durability. Securing the pistol to your hand are custom G10 grips, 25-LPI checkering and snake-scale serrations on the slide, keeping the Titan planted in the harshest of conditions. The combination of its all-steel frame, bull barrel and tactical rail gives the Titan balance and durability, resulting in the most formidable target-grade combat handgun on the market.

CAL: 10mm Auto FINISH: Matte black

## DW CHAOS

This double-stack 9mm is for competitors who don't have to worry about a power-factor requirement such as in 3-Gun. Built to tackle the rigors of the sport, the Chaos has 21+1 rounds on tap. Like all of our Elite Series Dan Wessons, it is hand built on a double-stack 1911 frame and tuned to perfection. With high capacity, a superbly crisp trigger and flawless reliability, the Chaos truly does reign supreme.

CAL: 9mm Luger FINISH: Matte black

## DW MAYHEM

Built for the Limited IPSC/USPSA® division as well as anyone after a superbly accurate target-grade 1911, the Mayhem is ready to shake things up. Built on our high-capacity steel 1911 frame, we've shaved weight from where you don't want it and added it to where you do. The 6" bull barrel and tactical rail add static "good weight." The 6"-long slide gives an edge on sight radius and pointability but is lightened to equal the weight of a 5". The result speaks volumes, with a gun that balances and feels like a Government-size model but points and shoots like a long-slide. The all-steel frame and industry-leading parts deliver the most well-balanced, softest-shooting 6" Limited gun on the market.

CAL: 40 S&W FINISH: Matte black

## DW HAVOC

The Havoc is designed to be the most well-balanced, softest-shooting Open gun on the market. Built on an all-steel, high-capacity version of the 1911 frame, it is fitted with industry-leading parts including a barrel and compensator that combine the highest level of accuracy with the most effective compensation available. The C-MORE® red dot allows for extremely fast target acquisition with its ultra-low mounting configuration. The Havoc is a handgun made for shooters by shooters, ready to dominate Open IPSC/USPSA® division.

CAL: 9mm Luger, 38 Super FINISH: Matte black

Limited Availability — The Dan Wesson Elite series typically sells out in the first few months of the year. Lead times of 6 months can be expected on these limited-production models.

# CZ RIMFIRE

## CZ 457

If we were to pick one thing that our previous rimfire platforms were lacking, it was an American-style push-to-fire safety — something Hunter's Education instructors and 4-H shooting coaches have begged us to incorporate for years. Though that was the most obvious change, we also took the opportunity to tweak a load of small things at the same time. In addition to the receiver-mounted, push-to-fire safety, we chopped almost an inch of length from the action and slab-sided it to reduce its footprint and weight. The stamped bottom metal of the 455 is gone, swapped for a classy two-piece interlocking system. To make scope fitment easier, we ditched the 90° bolt rotation in favor of a 60° rotation, allowing for larger ocular bell diameters with lower ring heights. To top it all off, the 457 now features a trigger adjustable for weight, creep and overtravel. With the exact same swappable barrel system as the 455 and the same reliable polymer magazine system, the 457 is without a doubt the best rimfire platform we've ever fielded.

### CZ 457 FEATURES

- Push-to-fire safety
- Trigger with adjustable pull weight, creep and overtravel
- Action fully machined from bar stock
- Cold-hammer-forged, hydraulically-lapped barrel
- Detachable magazine (5, 10, 25 and single-shot adapter available in 22 LR)
- Hardy nitride finish
- 11mm dovetail milled into receiver
- 60° bolt rotation
- Interchangeable barrels
- Interchangeable stocks

### CZ 457 VARMINT MTR

Taking our heavy-barreled rimfire to the next level, the 457 Match Target Rifle gets a bit more attention than the average 457 Varmint. Its Match chamber is cut to the tightest specification that CIP will allow, meaning it will perform impressively well with top-tier ammo. The MTR's Turkish walnut stock is designed with ergonomics in mind, and its vertical grip has a comfortable palm swell and laser stippling for texture. A large, flat forend has dual QD studs for running a bipod and a sling, and wrap-around stippling gives much more grip for the forward hand.

CAL: 22 LR STOCK/FINISH: Walnut/nitride

### CZ 457 VARMINT

The standard heavy-barreled version of the 457, the Varmint has a .866" cylindrical barrel. Not only does the heavy barrel make for good harmonics, it also allows the Varmint to perform well with a wide variety of rimfire loads, translating into an accurate platform for shooting targets or getting game. The Turkish walnut stock has an American-style comb for use with a scope and a wide, flat forend that rides a sandbag well. Laser-cut stippling gives grip fore and aft.

CAL: 22 LR, 17 HMR, 22 WMR STOCK/FINISH: Walnut/nitride

### CZ 457 PRO VARMINT SUPPRESSOR-READY

Always one of our most popular Varmint models, the Pro Varmint has a heavy 16.5" barrel threaded 1/2x28 for use with a suppressor or other muzzle device. Riding in a black-painted laminate stock, it incorporates features found on much more expensive stocks without pushing the price of the rifle through the roof. The short barrel gives plenty of time for the cartridge to get a full burn while increasing the rigidity of the barrel, resulting in a rifle that drives tacks. Quietly.

CAL: 22 LR STOCK/FINISH: Black painted laminate/nitride

### CZ 457 VARMINT PRECISION TRAINER SUPPRESSOR-READY

A constant in our rimfire line, the Precision Trainer was designed to provide the same look and feel as a full-size tactical rifle while allowing for more economical training. Though the golden days of cheap and plentiful 22 LR ammo may be behind us, the Precision Trainer has become more popular than we ever could have imagined.

Based off the PRS1 stock, this special Manners carbon-fiber composite stock provides a rock-solid platform and is finished in a three-color camouflage pattern with a base of carbon fiber peeking through the background. The stock itself has multiple layers of carbon fiber and fiberglass hand-laid in high-temperature epoxy resins, then placed in a vacuum and heat-cured to create the perfect resin-to-fabric ratio. Combined with a 24" tapered Varmint barrel threaded 1/2x28, the Precision Trainer is a paper-puncher with surgical precision.

CAL: 22 LR STOCK/FINISH: Camo composite/nitride

#### MODEL VARIANTS:

- CZ 457 Varmint Precision Trainer Suppressor-Ready — 0.866" profile 16.5" barrel, 1/2x28
- CZ 457 Varmint Precision Trainer — 0.866" profile 20.5" barrel, no muzzle threads

NEW

CZ 457 VARMINT AT-ONE®

Using the popular Boyd's AT-ONE® stock as its basis, this 457 Varmint variant makes an ideal trainer for the whole family. With the push of a button, length of pull can be adjusted from 12.5" to 14.25". Comb height is similarly adjustable, with 5/8" of rise available. The stiff laminate stock provides a nice, rigid platform from which to work and the 16.5" threaded heavy barrel makes fitting a suppressor easy.

CAL: 22 LR STOCK/FINISH: Nutmeg laminate/nitride

NEW

CZ 457 AMERICAN

The classic American-style rimfire rifle, this gorgeous 457 has a 24.8" barrel with no sights and is meant to be topped with a scope. Its Turkish walnut stock has a high, flat comb and a classic checkering pattern. Like all of our 457s, it has an 11mm dovetail milled into the top of its receiver for attaching scope ringmounts.

CAL: 22 LR, 17 HMR, 22 WMR STOCK/FINISH: Walnut/nitride

NEW

CZ 457 LUX

Designed in the European style, the Lux has a hogback stock fashioned from Turkish walnut. With a cheekpiece and comb ideal for use with its crisp iron sights, this 457 is one classy plinker. Like all 457s, it has an 11mm dovetail for mounting optics and can be quickly and easily swapped to a different chambering with the addition of a second barrel set (sold in our webstore). One 5-round magazine is included.

CAL: 22 LR, 17 HMR, 22 WMR STOCK/FINISH: Walnut/nitride

NEW

CZ 457 TRAINING RIFLE

Starting out in our classic 452 platform, transitioning to our switch-barrel 455, now manifested in our push-to-fire 457, the Training Rifle is famous in the niche of rimfire competition. With all the same features it's always had, the 457 Training Rifle has a 24.8" barrel, tangent rear sight (adjustable for distance) and beechwood stock with Schnabel forend.

Between the long sight radius and the crisp iron sights, it's no wonder the Training Rifle has become a favorite in open-sight Rimfire Sporter competition. An ideal rifle for introducing youth to the shooting sports, the Training Rifle is shipped with a 5-round magazine, but single-shot adapters and 10-round magazines are available.

CAL: 22 LR STOCK/FINISH: Beechwood/nitride

NEW

CZ 457 SCOUT

Built to be an ideal first gun for young shooters, the Scout has a short 12" length of pull. With simple leaf rear sight and blade front (rear adjustable for windage, front for elevation), learning the basics of sight picture has never been easier. Its 11mm dovetails on the receiver make adding a scope a breeze.

Own a suppressor? The 457 Scouts have muzzles that are threaded 1/2x28, allowing for hearing-safe shooting without the need for muffs or plugs.

As young shooters outgrow the short stock, adding a full-size stock is easy as can be. Any of our 457 stocks with a sporter barrel will fit (American, Lux, Training Rifle, etc.), and the same goes for the many barrel sets available for the 455/457 platforms.

Shipped with a single-shot adapter to teach ammo conservation, any of the 455/457 magazines will fit, with capacities of 5, 10 and 25 rounds.

CAL: 22 LR STOCK/FINISH: Beechwood/nitride

CZ 512 AMERICAN

Set up for optics, the 512 American has a Turkish walnut stock with laser-cut checkering. The unique semi-auto's action is comprised of an aluminum alloy upper receiver, which secures the barrel and bolt assembly, and a fiberglass-reinforced polymer lower half that houses the trigger mechanism and the magazine well. The modular design is easily maintained, requiring only a coin as a tool for fieldstripping. Sharing magazines and scope rings with the CZ 455, the 512 makes the perfect companion to your bolt-action CZ rifle.

CAL: 22 LR, 22 WMR STOCK/FINISH: Turkish walnut/blue

CZ 512 TACTICAL

Built as a tactical trainer, the 512 Tactical is dropped into an aluminum chassis with a 6-position adjustable stock. A monolithic Picatinny rail makes mounting optics a cinch. With extended magazine capacities, the 22 WMR version holds 10 rounds while the 22 LR holds 25. Its short 16.5" barrel is threaded for a suppressor.

CAL: 22 LR, 22 WMR STOCK/FINISH: Polymer and aluminum/blue

CZ 512 STANDARD

The standard iron-sighted version of the CZ 512, this model is the one that gave birth to all the other variants in the 512 line. One of the only affordable and reliable semi-auto 22 WMR rifles on the market, it has built a reputation as a tack-driver owing to its cold-hammer-forged barrel and crisp fully-adjustable iron sights.

CAL: 22 LR, 22 WMR STOCK/FINISH: Beechwood/blue

# CZ 527

## CZ 527

The smallest of our centerfire platforms, the CZ 527 has proven popular the world over. In Europe, it has won more awards in the “light rifle” category than any other rifle. Ever.

Designed specifically for small-base centerfire calibers, it is a true micro-length Mauser action. With controlled-round feed, a detachable single-stack magazine, a cold-hammer-forged barrel, integral 16mm dovetails and our renowned single set trigger, many people think it’s the ultimate small-caliber platform.

With such a small action, even longer-barreled Varmint models seem short and quick-handling. Whether you need a varmint chambering such as 17 Hornet or 204 Ruger, want to shoot deer or antelope with 6.5 Grendel or need to plink with steel-cased ammo in 223 Rem. or 7.62x39, we’ve got a 527 for the job.

### CZ 527 FEATURES

- True micro-length Mauser-style action
- Controlled-round feed
- Hammer-forged barrel
- Single set trigger
- Detachable magazine
- 16mm scope dovetails milled into the receiver
- Left-hand versions available in select calibers
- Because they are built to CIP spec, all CZ 223s are built to fire 5.56 ammunition. CIP spec doesn’t differentiate between the two.

## CZ 527 AMERICAN SYNTHETIC SUPPRESSOR-READY

Threaded 5/8x24 for a suppressor, this short, handy 527 is equally happy shooting steel or taking down hogs. Chambered in 300 Blackout or 7.62x39, it’s got enough knock-down power for most medium game at shorter ranges, and with sub-sonic loads available for both chamberings, plinking can be quiet as can be!

**CAL:** 300 Blackout, 7.62x39 **STOCK/FINISH:** Synthetic/blue

### MODEL VARIANT:

- CZ 527 **American Synthetic** — 223 Rem., 21.9" barrel, no muzzle threads

## CZ 527 VARMINT

The Varmint retains all of the features that made the 527 famous, from its controlled-round feed and claw extractor to its single set trigger and heavy cold-hammer-forged barrel. Scope mounts are milled directly into the top of the forged, square bridge receiver (rings not included), and the rifle comes with a 5-round detachable box magazine.

**CAL:** 17 Hornet, 204 Ruger, 223 Rem. **STOCK/FINISH:** Turkish walnut/matte blue

### MODEL VARIANT:

- CZ 527 **Varmint Suppressor-Ready** — 6.5 Grendel, 5/8x24 muzzle threads **NEW**

## CZ 527 VARMINT MTR

Tuned to perform, the Match Target Rifle is a bit different than most 527s. Not only does it have a heavier-than-normal barrel (measuring .866" at the muzzle), it also gets a fully-adjustable trigger very similar to the one found on the 557. Though it lacks the single-set function of other 527s, this trigger is able to be finely adjusted and is a superb choice for target shooting where precision is required.

Its Turkish walnut stock is impressively ergonomic — with stippling in all the right places, a vertical pistol grip and a wide forend that’s perfect for riding a sandbag.

The MTR is threaded for use with a suppressor (1/2x28 in 223, 5/8x24 in 6.5 Grendel).

**CAL:** 223 Rem., 6.5 Grendel **STOCK/FINISH:** Walnut/blue

scope not included

CZ 527 AMERICAN

The CZ 527 American features a classic American pattern stock, a sporter-weight hammer-forged barrel, a single set trigger and a recessed target crown. Made to be used with optics, the 527 American has a high, flat comb and the same 16mm dovetail as all 527s milled directly into the action.

A recent addition to the many chamberings available is the increasingly popular (and for good reason!) 6.5 Grendel. A 24" barrel allows you to extract as much velocity as possible out of the potent little round, and accuracy comes courtesy of CZ's cold-hammer-forged and lapped barrel.

Since 2015, all CZs in 223 Rem. ship with a 1:9" twist barrel for most bullets up to 70 grains.

CAL: 17 Hornet, 22 Hornet, 223 Rem., 204 Ruger, 6.5 Grendel, 7.62x39 STOCK/FINISH: Walnut/blue

MODEL VARIANT:

- CZ 527 American Left-Hand — 223 Rem.

CZ 527 CARBINE

The Carbine is an intermediate-range "brush gun." Weighing in at less than 6 lbs., this handy rifle has a straight comb walnut stock and open sights. Our most popular model chambered in 7.62x39, it combines low recoil with effectiveness on medium-sized game such as deer and wild boar, making it ideal for beginning hunters. Both chamberings offered in the Carbine are economical to shoot given their service-rifle heritage and the availability of surplus ammunition.

Built to CIP specifications, our 7.62x39 chambers are ideal for shooting steel-cased surplus ammo. Designed to shoot .311 bullets, some American brass ammo may not perform as well as the imported steel-cased variety because of SAAMI brass dimensions and varying bullet diameters.

CAL: 223 Rem., 7.62x39 STOCK/FINISH: Walnut/blue

CZ 527 LUX

The CZ 527 Lux has won more awards in the light rifle category in Europe than any other rifle — ever! Fitted with a Turkish walnut stock in the famous Bavarian pattern, the Lux is ideal for open-sight shooting, and the hooded front sight allows for a glare-free, crisp sight picture. Ships with a 5-round, single-stack magazine.

CAL: 22 Hornet, 223 Rem. STOCK/FINISH: Walnut/blue

MODEL VARIANT:

- CZ 527 Lux Left-Hand — 223 Rem.

THE CZ SINGLE SET TRIGGER SYSTEM

A lifetime of hunting will expose you to a multitude of situations. You will be presented with fleeting opportunities that require a quick shot, and when hunting dangerous game you must be prepared for the life-or-death shot to stop a charge. On the other hand, most shots will give you the opportunity to shoot from a more stable position such as a rest, shooting sticks or a practiced kneeling or prone position. The CZ single set trigger (SST) system provides the shooter with the options to effectively handle any shooting situation they are presented with.

The SST allows for both a standard hunting trigger and a light target trigger in the same rifle. By operating the rifle in the same manner as any other bolt action, the trigger is in the "standard" mode with the heavier of the two trigger pulls. By simply pushing the trigger forward until it "clicks," the crisp and light target trigger mode is set. The standard trigger is adjustable for weight, creep and overtravel. The set trigger function is only adjustable for weight but always breaks like glass. Many shooters will tell you that the single set trigger is a better aid to accuracy than a \$1,000 scope.

- A: Standard trigger pull weight
- B: Creep
- C: Overtravel
- D: Set trigger pull weight

CZ SST "Perfect Pull" Trigger Adjustment

**DISCLAIMER:** Do not attempt trigger adjustments unless you are confident in your ability to follow instructions for adjustments and safe operation.

Tools required: 6mm wrench, 7mm wrench, one very small and one large common flathead screwdriver

- Make sure the magazine and chamber are empty.
- Remove the stock from the barreled action.
- Cock the rifle, then adjust screw "B" in until it fires and back off ¼ turn.
- Loosen locking nut and remove screw "C" to allow easy access to screw "A."
- Adjust screw "A" to desired poundage and tighten the lock nut (ensuring that the screw position does not change).
- Replace screw "C," turn it all the way in, then back it out while pulling the trigger until it fires. Then back out an additional ¼ turn and tighten the lock nut for screw "C" (ensuring that the screw position does not change).

Set Trigger Adjustment and Operation

To adjust the set trigger weight, adjust screw "D" in to lighten and out to make heavier. If you prefer to completely disable the set function, turn screw "D" all the way in until the rifle fires, then back off ¼ turn.

This process will get you very close to the best trigger pull possible with only slight adjustments needed, if any, to get it to the "Perfect Pull" for you.

An activated set trigger is very sensitive to shock and during handling could unintentionally discharge if the set trigger is adjusted with too little travel. The safety of the SST adjustment can be checked with the rifle unloaded by repeated opening and closing of the bolt combined with moving of the safety to its "ON" and "OFF" positions in both set and unset modes. If the set trigger adjustment (engagement screw "D") is too light, it will go off when doing this. In this case, add more travel to the set trigger adjustment until it does not simultaneously go off.

For safety, activate the set trigger only after the rifle is loaded and when in position for the shot with the safety in the off position. Do not carry your rifle with an activated set trigger! If you have activated the set trigger and you do not immediately take the shot, keep your firearm pointed in a safe direction and activate the safety, then squeeze the trigger to deactivate the set feature.

# CZ 557

## CZ 557

CZ's newest centerfire platform, the 557 is a departure from the Mauser-style bolt found on 550 models. Instead, it has a short extractor and plunger-style ejector for smooth operation and enhanced ejection. The short extractor or "push feed" system also makes it easier to single-load the rifle, which many shooters prefer for range work.

With a receiver machined from steel billet, it wears CZ's integral 19mm dovetails for mounting a scope. Equipped with a 2-position safety, the bolt can be cycled while the rifle is on "Safe." To top it off, it comes with a fully adjustable trigger that allows the owner to tune weight, creep and overtravel to their liking. Paired with CZ's legendary cold-hammer-forged, factory-lapped barrel, the resulting rifle is destined to become a treasured hunting companion.

### CZ 557 FEATURES

- Push-feed action
- Square-bridge receiver
- Cold-hammer-forged barrel
- Barrel lapped for accuracy
- Integral 19mm scope bases
- Two-position safety
- Adjustable trigger

## CZ 557 AMERICAN

With a 24" version of our cold-hammer-forged and lapped barrel, the 557 American picks up where the short-barreled Sporter left off. The longer barrel squeezes a bit more velocity out of the chosen chamberings, to include 6.5 Creedmoor and 7mm-08. Its American-pattern stock has a strong pistol grip with a bit of a palm swell and is adorned with a classic checkering design borrowed from our Ultimate Hunting Rifle (UHR).

With a high comb and no sights, this rifle is intended for use with a scope, and built-in dovetails mean there are no bases required — allowing scopes to be mounted directly to the action and enabling a simpler, more robust attachment method.

**CAL:** 6.5x55, 270 Win., 30-06 (long action); 243 Win., 6.5 Creedmoor, 7mm-08, 308 Win. (short action) **STOCK/FINISH:** Walnut/blue

## CZ 557 AMERICAN SYNTHETIC

Equipped with a black synthetic stock, this rifle is impressively ergonomic. Its high, flat comb is ideal for being behind a scope, even for long periods of time, while its grip radius and forend are very comfortable on the hands. With a soft-touch finish that grabs onto you, it's the stock of choice for folks who know they'll be putting a gun through the ringer. Whether that means busting brush on a deer drive or riding in a scabbard into the wilderness, the 557 American Synthetic is up for the challenge.

With a high comb and no sights, this rifle is intended for use with a scope, and built-in dovetails mean there are no bases required — allowing scopes to be mounted directly to the action, enabling a simpler, more robust attachment method.

**CAL:** 6.5x55, 270 Win., 30-06 (long action); 243 Win., 6.5 Creedmoor, 7mm-08, 308 Win. (short action) **STOCK/FINISH:** Synthetic/blue

## CZ 557 LEFT-HAND

Left-handed shooters may not be a large group, but they sure are vocal! Bringing lefty-friendly operation to the medium game chamberings are the 557 Left-Hand and Left-Hand Short Action.

Built on the same CNCed action as the standard 557, the Left-Hand wears a handy, American-pattern stock paired with a 24" barrel to help squeeze a bit more energy out of the 30-06 chambering. The cold hammer forged and lapped barrel coupled to our tried-and-true 557 push-fed action mean this rifle will cut very respectable groups.

**CAL:** 30-06 **STOCK/FINISH:** Walnut/blue

### MODEL VARIANT:

- CZ 557 **Left-Hand Short Action** — 308 Win.

## CZ 557 VARMINT

Building on the incredibly precise 557 short action, the Varmint model adds a stout 25.6" barrel in a heavy profile that tapers to a 0.863" muzzle. Anchored in an incredibly ergonomic walnut stock, it has a healthy palm swell, laser-cut stippling and a flat forend. Matching the human form was the guiding principle in the stock's development, the result is an incredibly comfortable rifle to lay behind, whether you're punching paper, ringing steel or knocking off prairie dogs at great distances.

**CAL:** 308 Win. **STOCK/FINISH:** Turkish walnut/blue

# CZ 550 MAGNUM

## CZ 550 SAFARI MAGNUM

Known worldwide as the Brno 602, the 550 Safari Magnum has long ruled the roost when it comes to magnum capacity. A classic go-to for African professional hunters, many 602s are still riding the rack after many decades in the field. In the staple 375 H&H chambering, the 550 Magnum will hold one in the chamber and five in the mag, giving it more rounds on tap when dangerous game wants to get up close and personal.

With the controlled-round feed of the Mauser system, there's no chance to short-shuck the action when under stress, meaning positive ejection and sure feeding when the chips are down. With several configurations to choose from, the 550 Safari Magnums offer good looks, great value and most importantly — rock-solid reliability.

### CZ 550 MAGNUM FEATURES

- Mauser-style, controlled-round feed action
- Square-bridge receiver
- Cold-hammer-forged barrel
- Barrel lapped for accuracy
- Integral 19mm scope bases
- Two-position safety
- Single set trigger

### CZ 550 BADLANDS

Energy — and a lot of it. It's a real asset when taking big game such as elk and bison at longer distances. As a hunting round, the 338 Lapua delivers incredible energy at normal ranges, with more than enough to do the job at extended distances. At 800 yards, the 300-grain hunting load still carries over 2,000 ft.-lbs. of energy, more than enough for any North American game.

This long-range hunting rifle is anchored in an Aramid composite stock with a full-length aluminum bedding block. Threaded to the end of the premium 25" medium-weight barrel is a custom muzzlebrake that both tames the recoil and directs the blast forward.

CAL: 338 Lapua STOCK/FINISH: Aramid composite/blue

### CZ 550 SAFARI MAGNUM

Known worldwide as the 602 Brno, the CZ 550 Safari Magnum is a true full-size magnum, not a smaller action blown out to barely hold the cartridge. The rifle of choice for most Professional Hunters in Africa, odds are that the rifle backing you up on a dangerous game hunt was made by CZ.

Features include 3-leaf express sights (1 standing, 2 folding), hammer-forged barrel and single set trigger. The stock is made from select Turkish walnut and has a classic safari shape. The controlled-round feed and fixed ejector make this rifle reliable enough for heavy and dangerous game, while the reasonable heft helps tame the recoil.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby STOCK/FINISH: Field-grade walnut/blue

### CZ 550 AMERICAN SAFARI MAGNUM FIELD GRADE

The American model retains the quality and reliability of the original CZ 550 Safari Magnum, but is fitted into an American-pattern stock with a straight comb, making it ideal for use with optics. It still retains the back-up express sights in case the optic goes down or tight confines dictate the optic needs to be removed.

Available in Field and Fancy grades, as well as a Left-Hand Field Grade in 375.

Note — Order Warne Quick Detatch rings for proper fit on the LH model. Also, for those who want a left-handed ASM in a chambering other than 375, our rifle custom shop can oblige. Email [info@safariclassics.com](mailto:info@safariclassics.com) or call (800) 955-4486 x338 for more details.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby, 458 Lott, 505 Gibbs STOCK/FINISH: Field-grade walnut/blue

#### MODEL VARIANTS:

- CZ 550 American Safari Magnum Walnut Field Grade — 375 H&H, Left-Handed
- CZ 550 American Safari Magnum Walnut Fancy Grade

### CZ 550 AMERICAN SAFARI MAGNUM ARAMID COMPOSITE

If you expect the going to get rough, this composite-stocked rifle is the way to go. With Aramid composite-reinforced fiberglass and a full-length aluminum bedding block, this is the ultimate in strength and stability. Designed and built to handle any condition imaginable from Alaska to Africa, it's as tough as you are.

CAL: 375 H&H Mag., 458 Win. Mag., 416 Rigby, 458 Lott, 505 Gibbs STOCK/FINISH: Aramid composite/blue

# SAFARI CLASSICS®

## SAFARI CLASSICS

A stand-alone brand of hand-built safari guns, each Safari Classics rifle is built to order at our custom shop in Warsaw, Missouri. Beginning with our Czech-made 550 Magnum action, they feature the CZ single set trigger system tuned to customer specifications. A #1 Fancy Grade American Walnut stock is glass-bedded to the rifle's action and is fitted with dual crossbolts and a straight comb ideal for use with an optic. Backup express sights come standard, with three heights of rear blade for varying distances. A barrel band sling mount rounds out the standard feature set.

Customization can be had from mild to wild, with simple add-ons like bolt jewelry or ebony forend and grip caps to custom finishes or our legendary pop-up-peek — a sight that stows in the rear bridge of the receiver in the event that an optic kicks the bucket.

### SAFARI CLASSICS CUSTOM-GRADE RIFLES FEATURES

- CZ 550 Magnum action with two-position positive safety
- Single set trigger set up to your specifications
- Glossy-blue or matte-blue finish on metal parts
- No. 1 Fancy Grade walnut stock with straight comb and dual crossbolts
- Barrel band with sling attachment

All Safari Classics rifles are hand-built to order, call 1-800-955-4486 x4709 for options and pricing.

### SAFARI CLASSICS MAGNUM EXPRESS RIFLE

The big-bore Magnum Express rifle is meant to house cartridges from 338 Lapua and 375 H&H on up to monsters like the 505 Gibbs and 550 Magnum. Intended for dangerous-game hunting, its straight comb is ideal for optics, with enough forgiveness to easily get down on the backup express sights should circumstances require their use.

The rifles chambered in 505 Gibbs, 500 Jeffery and 550 Magnum include a mercury recoil reducer installed in the stock, which can also be added to other chamberings if desired. Standard finish is either matte or gloss blue, though some customers opt for rust blue, satin blue or even a weather-resistant coating.

For more information, contact the Safari Classics Custom Shop at [info@cz-usa.com](mailto:info@cz-usa.com) or (800) 955-4486 x4709.

### SAFARI CLASSICS EXPRESS RIFLE

For the hunter who wants a plains-game rifle with the same feel and features as their dangerous-game rifle, the Express Rifle is designed for cartridges that fit in standard-length actions. Whether that means 270 or 9.3x62, we'll accommodate your chambering of choice. Clad in the same #1 Fancy Grade stock, it can be built with any of the features of its larger-actioned counterpart.

Available in (but not limited to) 425 Westley Richards, 416 Ruger, 416 Taylor, 375 Ruger, 9.3x62, 338 Win. Mag., 300 Win. Mag., 30-06 and 270 Win.

ADJ — Adjustable, F — Fixed, D — Detachable, HF — Hammer Forged, SST — Single Set Trigger

*Shotguns*

## CZ ALL-AMERICAN SINGLE TRAP

- 30", 32", or 34" single barrel
- High, vented rib with white front bead and small white mid-bead
- Ported barrel with lengthened forcing cone
- Loaded with adjustable features:
  - Length of pull (14½" to 15½")
  - Toe in/toe out
  - 4-way adjustable parallel comb
  - Trigger shoe reach (3/8" of adjustment)
- 5 extended chokes
- Premium internals, drop-in locking blocks and replaceable hinge pins
- Manual safety
- Wide beavertail forend

**NEW**

## CZ ALL-AMERICAN

- 32" Doubles set with 50/50 raised rib
- Barrels are ported with lengthened forcing cones
- Adjustable features:
  - Length of pull (14½" to 15½")
  - Toe in/toe out
  - 4-way adjustable parallel comb
  - Trigger shoe reach (3/8" of adjustment)
- Five extended, knurled chokes
- Premium internals, firing pins riding in bushings
- Built to be shot heavily for years, All-Americans feature drop-in locking blocks and replaceable hinge pins
- Mechanical trigger, manual safety
- Healthy right-hand palm swell, full forend
- Hardy silver-soldered ribs
- Oiled stock finish for easy touch-up

## CZ ALL-AMERICAN TRAP COMBO

(BOTH UNSINGLE WITH ADJUSTABLE RIB AND A STANDARD BARREL SET)

- 32" Unsingle with dial-adjustable aluminum rib (From 100% high to 50/50)
- 32" Doubles set with 50/50 raised rib
- All barrels are ported with lengthened forcing cones
- Adjustable features:
  - Length of pull (14½" to 15½")
  - Toe in/toe out
  - 4-way adjustable parallel comb
  - Trigger shoe reach (3/8" of adjustment)
- Extended, knurled chokes in a variety of constrictions:
  - (2 CYL, 2 IC, 1 LT MOD, 2 MOD, 1 IMP MOD, 2 FULL, 1 X-FULL)
- Premium internals, firing pins riding in bushings
- Built to be shot heavily for years, All-Americans feature drop-in locking blocks and replaceable hinge pins
- Mechanical trigger, manual safety
- Healthy right-hand palm swell, full forend
- Hardy silver-soldered ribs
- Oiled stock finish for easy touch-up

Built specifically for ATA shooters who compete in both trap singles and doubles and want one gun to do it all, the All-American Trap Combo is the tool for the game! This two-barrel set combo comes in a custom lockable aluminum case from Americase®.

## CZ SCTP STERLING

After several years spent homing in on the ideal shotgun for female shooters, a truth presented itself — those unique dimensions required to fit women with long necks and slender faces are nearly interchangeable with those needed to properly fit many youth shooters. As the product photo demonstrates, these dimensions create a stock that looks very different from most other shotguns, allowing these shooters to keep their heads up and eyes on target. A 4-way adjustable comb helps fine-tune the fit and increased pitch makes it much more comfortable to shoulder (around 8°).

This classy shotgun is built on the Upland Sterling receiver and is chambered in 12 gauge with 28" barrels. It handles both 2¾" and 3" shells.

### MODEL VARIANT:

- CZ Sctp Sterling Southpaw — Cast on for left-handed shooters

## CZ REDHEAD PREMIER TARGET

The Redhead Premier Target is assembled like the standard Redhead Premier but with a different purpose in mind. This over/under has been designed to crush clay targets, plain and simple! It comes fitted with a special Monte Carlo stock that keeps the gun on your shoulder while keeping your head up to see the clays. Add to that a healthy right-hand palm swell, 30" barrels and a stepped rib designed for rising trap targets — it's the perfect choice for those wanting to own a true target gun at an affordable price. Shipped with a set of black extended and knurled choke tubes, the Redhead Target has laser-cut checkering and a 1-piece CNCed receiver.

## CZ SHARP-TAIL TARGET

This new target side-by-side carries all of the mechanics as the Sharp-Tail but with a 30" barrel and a 14¾" length of pull. Originally designed to tackle side-by-side sporting clays events, it is a classy double gun that doesn't carry the accustomed weighty price tag. Equipped with a set of extended, knurled black choke tubes, it's the perfect choice for a clay shooter or gentleman hunter.

## CZ 712 G2 TARGET

Equipped with a soft-recoiling gas piston system and larger, more comfortable target-style stock, the 712 Target is a joy to shoot. Its soft-shooting nature and affordable price make it a favorite for youth shooters and many others looking for a target shotgun that won't break the bank.

Right at home on the trap field, the Target's 30" barrel has a stepped rib that helps drop the shotgun out of the shooter's line of sight. With a hardy matte-black chrome finish and 5 interchangeable choke tubes, this target gun can easily pull double duty chasing both birds and clays.

## CZ 612 TARGET

One classy pump gun, the 612 Target is fitted with Select-grade wood in a glossy oil finish while the metalwork gets a deep polished blue. With a factory-tuned trigger system, raised rib and comfortable Monte Carlo stock, it's ready to kill some clays. An assortment of stock shims help users adjust drop and cast to achieve a better fit, while a set of three extended chokes and a pair of white beads round out the package.

## CZ SUPREME FIELD

Whether you're a clayshooter or a hunter, nothing quite matches the feeling of shooting a bespoke shotgun. We do a number of custom, built-to-order shotguns each year and wanted to introduce a high-grade production gun that carries the flair of these customs but at a bit better price point.

With deep relief engravings cut by hand, the Supreme Field is fitted to a Grade III stock that shows off the grain structures that Turkish walnut is famous for. With our one-piece CNCed receiver, the Supreme Field is chambered in 12, 20 and 28 gauge, with automatic ejectors standard on all three gauges.

Its full forend is sharply-checked and a solid mid-rib both adds to the class and gives this 28" barreled shotgun a smooth swing.

Shipped in a protective hard case with five interchangeable extended chokes.

## CZ WINGSHOOTER ELITE

One of the classiest shotguns in its price range, the Wingshooter Elite has faux sideplates that are ornately hand-engraved, reminiscent of our custom-grade guns that cost much more. It carries all of the best features in our over/under line, with our one-piece CNCed receiver, single selectable trigger, solid mid-ribs, ejectors and a two-tone hard-chromed finish. Add to that laser-cut checkering, a pistol-grip stock and a white bead, and it's hard to find a more elegant shotgun for the money.

Available in 12 and 20 gauges with 3" chambers, selectable 28" barrels, Turkish walnut stocks, independent auto ejectors and 5 flush-mount choke tubes.

CZ UPLAND STERLING SOUTHPAW

Cast on for left-handed shooters, the Upland Sterling Southpaw shares most of the other features of the Upland Sterling, making it just as happy breaking clays as it is chasing upland game. Its two-tone receiver has polished and matte chrome, giving it not only great looks but a very hardy finish. Operating with the clockwork precision that the Upland Sterling is known for, this gun comes with 5 flush-mount choke tubes, a mechanical trigger and safety with selectable barrels.

Available in 12 gauge with a 3" chamber, 30" barrels, ejectors, cast on stock (1/4" at the heel and 7/16" at the toe), with a regular right-handed top lever latch.

MODEL VARIANT:

- CZ Upland Sterling — 12 gauge, cast off for right-handed shooters, 28" barrels

CZ REDHEAD PREMIER

A mainstay in our lineup, the Redhead Premier is truly an all-purpose shotgun. Auto-ejectors propel spent shells from the chambers, and a solid mid-rib gives it a classy look and a more deliberate swing. Equally at home on the sporting clays course or in the field chasing roosters, its wrap-around checkering provides plenty of purchase.

Available in 12 and 20 gauges, the Redhead is fitted with either 26" or 28" barrels with a classy white bead atop the rib. A single selectable trigger and five flush mount chokes are included in its hard protective case.

MODEL VARIANT:

- CZ Redhead Premier Reduced Length — 20 gauge with 24" barrels and 13" length of pull

CZ QUAIL

Built at the request of Pheasants Forever, the Quail is their 2019 Youth Gun of the Year.

Nearly identical to the Drake below, what sets the Quail apart is a slightly shorter length of pull that makes it more comfortable to carry and shoot for youth shooters and hunters. The mid-rib delete trims a noticeable amount of weight from the muzzle end of this over/under, making it easier to shoulder and swing.

Chambered in 20 gauge and fitted with 28" barrels, the Quail comes in at the same great price point as the Drake, making it a much more attainable investment than most similarly-equipped youth shotguns.

Once broken in a bit, extractor guns tend to be substantially easier to open than their ejector counterparts, and this gun is no exception. A single extractor lifts spent shells from the chambers, and the shotgun ships with five interchangeable chokes.

CZ DRAKE

There is no doubt in our minds that the Drake is the best bang for the buck in the over/under category. Built on our one-piece CNCed receiver, the Drake has a single selectable trigger, meaning you can choose whether to fire top barrel or bottom barrel first. With a simple, robust extractor to lift spent shells, the Drake sheds some weight with a mid-rib delete.

The Drake can be had in 12, 20 and 28 gauge or .410 bore. All are fitted with Turkish-walnut furniture with sharp laser-cut checkering that sticks them in the hand. With 28" barrels and five interchangeable chokes (except for .410, which has fixed IC/Mod barrels), the Drake ships in a protective plastic hard case.

MODEL VARIANT:

- CZ Drake Southpaw — Cast on for left-handed shooters, 12 or 20 gauge

CZ UPLAND ULTRALIGHT GREEN

An over/under on a diet, we trimmed weight from the Upland Ultralight by building it on a CNCed alloy receiver, foregoing the mid-rib and hollowing out the buttstock. Though this doesn't necessarily make it the ideal choice for a day on the sporting clays course, it excels in the field — with the 20-gauge version clocking the scales at just 5.8 lbs.!

To make things simple, a single extractor lifts shells to hand as the action is opened. Five interchangeable chokes, laser-cut checkering, a hard, matte-chrome finish and 28" barrels in 12 or 20 gauge round out the stats.

- MODEL VARIANT:**
- CZ **Upland Ultralight** — Black receiver, 12-gauge only, 26" or 28" barrels

CZ REAPER MAGNUM

With the same 3½" chambers of the Swamp Magnum, the 12-gauge Reaper Magnum is built to slay turkeys! Offering what single-barrel turkey guns cannot, this magnum shotgun allows a hunter to equip two vastly different chokes, allowing the choice of short- or long-range constriction with the flip of the barrel selector switch.

Shorter 26" barrels make it more maneuverable in the woods or blind, while the top removeable Picatinny-style rail makes adding an optic easy as can be. Polymer stocks clad in camouflage help it blend in, and adding a sling is simplified with QD swivels front and back. The Reaper Magnum ships with five extended interchangeable chokes, including an extra full.

CZ SWAMP MAGNUM BLACK

If you ask Bruce Horrell, host of CZ-USA's Gun Dog TV, why he shoots 3½" shells, he'll answer, "Because they don't make 4 inch." For the folks who want to dish out the heat on waterfowl, we've got the over/under to do it with.

The only over/under in our line that has an automatic safety, it engages every time the action is opened, giving an added level of safety to the duck blind. The hardy black polymer stock will take a beating much better than wood — an inevitability in waterfowling. These 3½" chambered 12 gauge guns have 30" barrels and are ready to knock big birds from the sky.

CZ SWAMP MAGNUM CAMO

With the same feature set as its all-black variant above, the Swamp Magnum Camo gets hydrodipped in camouflage. The same hardy polymer stocks and black metalwork make this the perfect over/under for the blind or boat, and 3½" chambers coupled with long 30" barrels give it a great swing.

# SIDE-BY-SIDE

## CZ SHARP-TAIL

With a single selectable mechanical trigger and pistol grip, the Sharp-Tail is one of the sharpest-looking side-by-sides on the market. Built around a lithe one-piece CNCed receiver, the metalwork is finished in a beautiful color case. With independent, floating firing pins, coil-spring-operated hammers and redesigned sears, the result is longer life and greater consistency.

Available in 12, 16, 20 and 28 gauge and .410 bore with 28" barrels, Turkish-walnut stocks and a robust single extractor. The 12, 20 and 28 gauges ship with five interchangeable chokes, while the 16 gauge and .410 have fixed IC/Mod barrels.

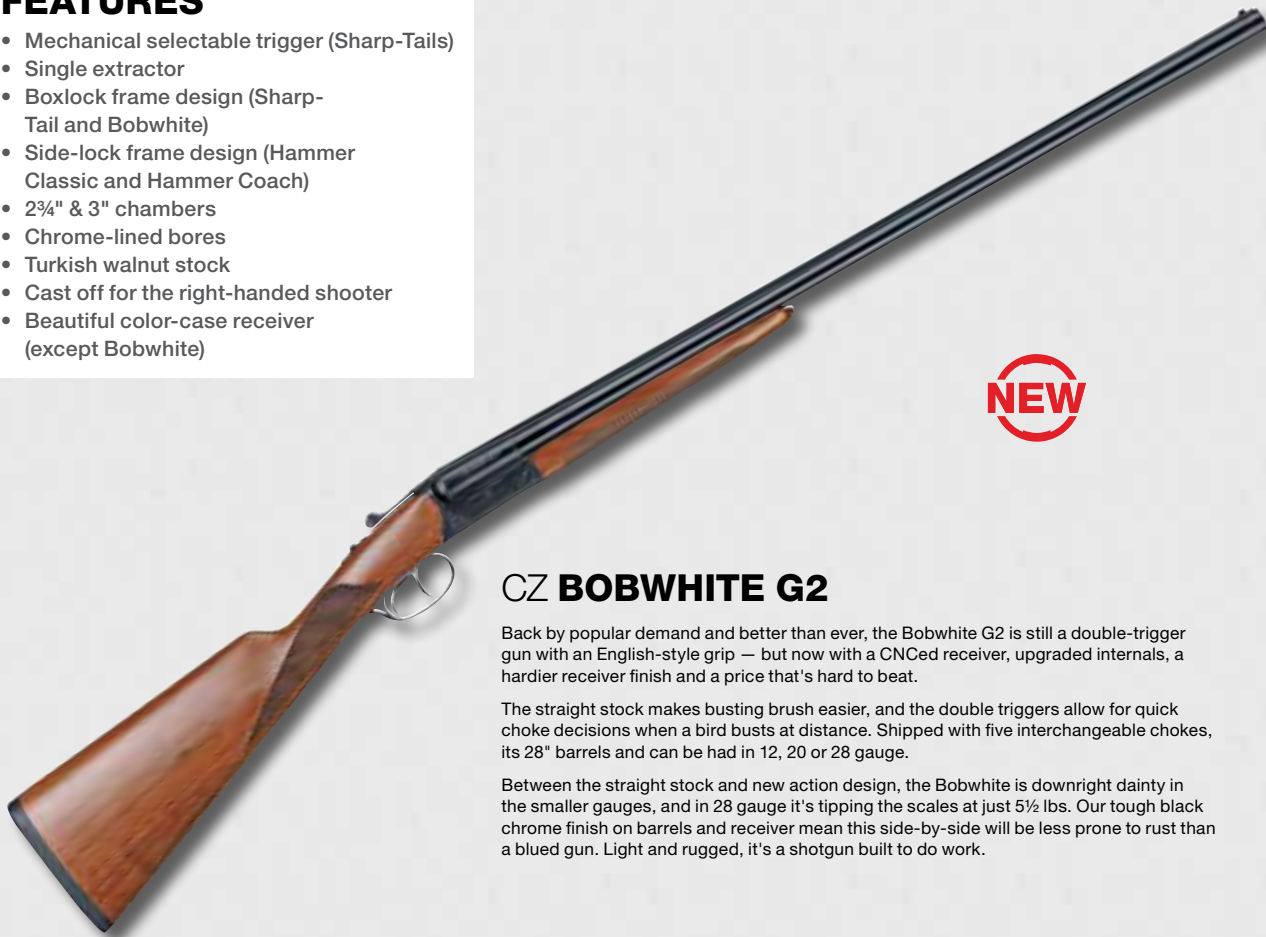

## CZ SHARP-TAIL COACH

With the same slender action of the Sharp-Tail as well as its single selectable trigger, the Sharp-Tail Coach is a more modern coach gun than our hammered version on the opposite page. With a mechanical trigger and a manual safety, it has a single extractor that lifts shells for removal. Its 20" barrels are cylinder bore and it can be had in 12 or 20 gauge and will chamber 2¾" or 3" shells.

Watch CZ-USA shotguns in action on the epic online birdhunting series **Project Upland** ([projectupland.com](http://projectupland.com)).

# SIDE-BY-SIDE FEATURES

- Mechanical selectable trigger (Sharp-Tails)
- Single extractor
- Boxlock frame design (Sharp-Tail and Bobwhite)
- Side-lock frame design (Hammer Classic and Hammer Coach)
- 2¾" & 3" chambers
- Chrome-lined bores
- Turkish walnut stock
- Cast off for the right-handed shooter
- Beautiful color-case receiver (except Bobwhite)

NEW

## CZ BOBWHITE G2

Back by popular demand and better than ever, the Bobwhite G2 is still a double-trigger gun with an English-style grip — but now with a CNCed receiver, upgraded internals, a harder receiver finish and a price that's hard to beat.

The straight stock makes busting brush easier, and the double triggers allow for quick choke decisions when a bird busts at distance. Shipped with five interchangeable chokes, its 28" barrels and can be had in 12, 20 or 28 gauge.

Between the straight stock and new action design, the Bobwhite is downright dainty in the smaller gauges, and in 28 gauge it's tipping the scales at just 5½ lbs. Our tough black chrome finish on barrels and receiver mean this side-by-side will be less prone to rust than a blued gun. Light and rugged, it's a shotgun built to do work.

## CZ HAMMER CLASSIC

A modern incarnation of the fowling piece of old, the Hammer Classic has fully-functional hammers and long, 30" barrels. Built to handle modern loads, both hammer models have a true side-lock frame design and 3" chambers. Dual triggers and color-case finish round out the look, and five flush interchangeable chokes lend modern functionality.

## CZ HAMMER COACH

The chopped-down version of the Hammer Classic, the Coach is popular with Cowboy Action shooters who want a period-correct firearm that can handle modern loads. With fully-functional hammers and dual triggers, short 20" barrels, color-case finish and cylinder-bore barrels, the Hammer Coach will dish out birdshot, buckshot or slugs up to 3" in length — take your pick!

CZ 1012

The next evolution in our semi-auto shotgun line, the 1012 uses a gas-less operating system. Instead of redirecting gas from the barrel to run the action, the 1012 uses a spring within the bolt to store energy during the shotgun's recoil, spending this energy a split second later to rotate and unlock the twin lugs from the barrel extension and withdraw the spent shell.

The major advantage of this gas-less system is the less stringent maintenance schedule. Unlike gas guns that need periodic cleaning of the piston and magazine tube, the 1012's needs are vastly fewer. During our testing, we pushed 1012s to 5,000 rounds without a drop of oil or cleaning of any sort, while experiencing zero parts breakage or malfunctions. In normal use, the occasional cleaning and oiling should be more than enough.

Additionally, the gas-less system itself is tuned to run a wider variety of shells — from light-recoiling target loads up to the smoking-hot 3" magnums currently on the market.

MODEL VARIANTS:

- CZ 1012 Bronze — Bronze receiver
- CZ 1012 Grey — Grey receiver

CZ 1012 SYNTHETIC CAMO

The same clean-running, gas-less system 1012 is also available in a hardy synthetic-stocked variant. Clad in waterfowl camo, it'll eat even the hottest 3"-magnum loads out there.

MODEL VARIANT:

- CZ 1012 Synthetic — Black stock and metalwork

CZ 712 G2 GREEN

The CZ 712 is our tried-and-true gas-operated semi-automatic that enabled CZ-USA's David Miller to set a new world record, breaking 3,653 clays in 1 hour. Built on a lightweight alloy receiver, it accepts 2¾" and 3" shells and is an all-rounder, a great choice for upland game, waterfowl or clays. The barrel on the 712 is chrome-lined and has a matte-black, hard-chrome exterior that will resist corrosion for many seasons in the field. Fit with a Turkish walnut stock, the G2 version adds laser-engraved checkering, right-hand palm swell as well as a barrel lock ring to make assembly easier.

MODEL VARIANTS:

- CZ 712 G2 — Black receiver, 26" or 28" barrel
- CZ 720 G2 — Black receiver, 20 gauge, 26" barrel
- CZ 720 G2 Reduced Length — Black receiver, 20 gauge, 24" barrel, 13" length of pull

CZ 712 G2 UTILITY

The Utility is exactly that — an all-purpose tool good for anything from home protection to pest control on the farm. Its small size makes it a very handy shotgun that is easy to stash, whether behind the truck seat or behind the closet door, allowing it to be there when you need it most. Chambered for 2¾" and 3" shells.

CZ 912

A great choice for the bird hunter or recreational clay shooter, the 912 is built on an alloy receiver and finished in a high-gloss black chrome. Though similar in many respects to the 712, the 912 houses its action spring in the buttstock, making cleaning the gas system even easier.

With modern stock lines, a 28" barrel and a ventilated butt pad to soak up recoil, the 912 will hold 4+1 shells and is designed to shoot everything from standard field loads all the way up to 3"-magnum hunting loads.

MODEL VARIANT:

- CZ 920 — 20 gauge

PUMP ACTION

CZ 612 FIELD

Simple, strong and smooth, the 612 Field is designed to shoot everything from targets to turkeys. With dual action bars and an aircraft-alloy receiver, the Field wears a Turkish-walnut stock with an oil finish that’s easy to touch up through the years. Fitted with a 28" barrel with a brass bead, metalwork is a matte blue.

Chambered for 2¾" and 3" shells and supplied with three chokes, it’s the hardest-working shotgun in our line.

CZ 612 MAGNUM TURKEY

The 612 Magnum Turkey was created for the turkey woods and is finished in camo to match. This pump gun comes equipped with two chokes, one extra-full to deliver maximum pellets to the kill zone and one modified for upland hunting and steel shot.

Available in 12 gauge with a 26" barrel, the Magnum Turkey has camo-dipped polymer stocks and will chamber 2¾", 3" and 3½" shells.

CZ 612 MAGNUM WATERFOWL

Built for the goose blind, the 612 Magnum Waterfowl boasts the perfect waterfowl camo pattern combined with a 3½" chamber for magnum shotshells. This machine is the best tool for making big birds fall from the sky. The 612 Magnum Waterfowl ships with 5 extended black choke tubes.

Available in 12 gauge with a 28" barrel, the Magnum Waterfowl is hydrodipped in camo and will chamber 2¾", 3" and 3½" shells.

Fitted with select-grade wood!

CZ 628 FIELD SELECT

For those who want a light, classy pump gun to carry in the field, we put together the perfect shotgun. Built on a gauge-specific 7075 aluminum action, this 28 gauge has a deep, glossy-blue finish and select-grade Turkish walnut. A set of interchangeable chokes lets you tune constriction, and the full forend and pistol grip help make this lithe shotgun feel good in the hands. With a 28" barrel, the 628 clocks in at just 5.4 lbs., lightening the load for those full days chasing birds. The 628 is chambered for 2¾" shells.

MODEL VARIANT:

- CZ 620 **Field Select** — 20 gauge, 3" chamber

CZ PUMP ACTION FEATURES

- Dual action bars for smooth cycling
- 4+1 capacity, 2¾" & 3" shells (2¾" only in 28 ga.)
- Barrel lengths: 26", 28" and 30"
- Chrome-lined bore from chamber to choke nest
- Interchangeable choke tubes
- Thick rubber recoil pad
- Turkish-walnut stocks with neutral cast
- Shim kit to allow tuning of stock cast and drop
